Journal of Electron Spectroscopy and Related Phenomena 80 (1996) 519–527

JOURNAL OF ELECTRON SPECTROSCOPY and Related Phenomena

Author index

Bold numbers **78**, **79** and **80** refer to Volume numbers, i.e. Parts A, B and C, respectively.

Abe, H. **79**, 5
Abe, M. **79**, 167
Abo, M. **80**, 101
Abukawa, T. **80**, 147, 177, 233
Achiba, Y. **78**, 453, 493
Adachi, H. **78**, 79
Adachi, J.-I. **79**, 491
Agui, A. **79**, 125, 191, 195
Ahmed, S. **79**, 429
Aita, O. **78**, 179, 183; **79**, 179
Aiura, Y. **78**, 175, 199
Ajello, J. **79**, 429
Akaki, O. **78**, 171, 441, 457
Akatsu, H. **80**, 133
Akimitsu, J. **78**, 191
Akimoto, I. **78**, 445, 449; **79**, 163
Aksela, H. **79**, 303
Aksela, S. **79**, 303, 247
Al-Omari, A.K. **79**, 381, 463
Allen, J.W. **78**, 57
Altun, Z. **79**, 299
Amusia, M.Ya. **79**, 295
An, K.S. **80**, 165
Anderson, E. **80**, 365
Anzai, S. **78**, 111
Aoki, S. **80**, 37, 357, 365
Aono, M. **80**, 241

JOURNAL OF ELECTRON SPECTROSCOPY and Related Phenomena

Subject index

Bold numbers **78**, **79** and **80** refer to Volume numbers, i.e. Parts A, B and C, respectively.

Ab initio calculation
Core hole effect in NEXAFS spectroscopy of aromatic hydrocarbons: chrysene, perylene and coronene, **78,** 383
Absorbate systems
S-KLL and Cl-KLL spectator Auger decays in monolayered and multilayered molecules, **79,** 215
Acetylene
Autoionization of acetylene studied by two-dimensional photoelectron spectroscopy, **80,** 1
Actinide
Photoemission and inverse photoemission studies on actinide materials – does any model work?, **78,** 57
Adsorption
Antimony adsorption on III–V(110) surfaces: growth and structure studied by photoemission and photoelectron diffraction, **80,** 143
Al K-edge
Full Multiple Scattering calculations on silicates and oxides at Al K-edge, **79,** 21
Al
Total photoelectric yields of aluminum thin films near the Al $L_{2,3}$ edge, **79,** 17
Alkali earth fluoride
Vacuum UV photoelectron dynamics in alkali earth fluorides: yield, Auger effect, and luminescence, **79,** 151
Alkali halide
Auger-free luminescence in mixed alkali halides, **79,** 117
Decay kinetics of exciton luminescence from two coexisting off-center configurations in KCl:I, **79,** 167
Lattice relaxation in Auger decay-free core luminescence, **79,** 219
Luminescence from self-trapped excitons in BaFCl–BaFBr solid solutions, **79,** 159
Multiplication of electronic excitations and formation of radiation defects in alkali halides, **79,** 39
Optical luminescence yield spectra of KCl:Tl produced by Cl K- and K K-edge excitations, **79,** 155
Surface core exciton of alkali chloride film on Si(100), **80,** 205
Time-resolved luminescence study on relaxation dynamics and morphology of self-trapped excitons in ionic crystals, **79,** 33
Magnetic circular dichroism study of KBr and RbBr excitons, **78,** 247
Alkane solution
Photoionization cross section of aromatic molecules in liquid alkanes, **78,** 419
Alloy
Electronic structures of noble metal–Pd binary alloys studied by photoemission using synchrotron radiation, **78,** 43
Amorphous alloy
Plasmons in amorphous CaAl alloys determined from photoemission and electron energy loss spectroscopy, **78,** 511
Amorphous SiO_2
Photo-induced structural change in a-SiO_2 with undulator radiation, **80,** 69
Anatase
UV reflection spectra of anatase TiO_2, **78,** 75
Angle resolved photoemission
Unusual photoelectron angular distribution of Kish graphite, **78,** 465
Angle-resolved Auger spectroscopy
Excitation energy dynamics observed in N_2 Auger spectra near the K-shell threshold, **79,** 445
Angle-resolved photoemission
Angle-resolved photoemission from oriented thin films of naphthacene: comparison with theoretical spectra, **78,** 391
Evolution of the electronic structure with doping in $Bi_2Sr_2CaCu_2O_{8+\delta}$ – Angle resolved phot, **78,** 167
Angle-resolved ultraviolet photoelectron spectroscopy of oriented film of model compound of poly(*p*-phenylene): wave number(*k*)-conservation and *k*-blurring in a system with small number of repeating units
Angle-resolved ultraviolet photoemission spectroscopy
Angle-resolved photoemission study of $MxTiS_2$ (M = Mn, Fe, Co, Ni; x = 1/3, 1/4), **78,** 477
Angular distribution of photoelectrons

Photoionization of polarized excited Li atoms, **79,** 275
Anthracene
A cluster model to explain the ionization potential and energy positions of photocurrent structures of anthracene doped in supercritical xenon as a function of, **78,** 415
Antimony
Antimony adsorption on III–V(110) surfaces: growth and structure studied by photoemission and photoelectron diffraction, **80,** 143
Ar
Density dependence of the ionization potential of H_2S in argon, **79,** 463
Multiple photoionization of free atoms, **78,** 19
Argon
Third molecular continuum in VUV radiation of solid Ar, **79,** 107
Atom
New experiments in photoabsorption studies of singly and multiply charged ions, **79,** 283
Atomic fluorine
Observation of the $2p^4(^1S)ns$, md excitations in atomic fluorine, **79,** 293
Atomic photoionization
A new approach to the complete experiment of atomic photoionization, **79,** 339
Au–Ag alloy
Study of the electronic structure of disordered Au–Ag alloys using synchrotron radiation, **78,** 127
Au
Surface core level shifts of the Au adsorbed Si(111) reconstructed surfaces, **80,** 229
Auger decay
Auger decay of fixed-in-space linear molecules, **79,** 437
Auger effect
Multiple photoionization of free atoms, **78,** 19
Auger electron photon coincidence
Auger-electron-photoion coincidence studies on ionic fragmentation following the Si 2p ionization of SiF_4, **79,** 495
Auger electron
Core attraction v.s. electron–electron repulsion in the lopsided energy sharing between a photoelectron and an Auger electron, **79,** 237
Auger free core luminescence
Lattice relaxation in Auger decay-free core luminescence, **79,** 219
Auger free luminescence decay
Decay of core excitons and STE formed at high density in BaF_2 and CsCl single crystals, **79,** 43
Auger spectra
Quantitative investigation of the decay of KrI $3d^9np$ resonances: cross sections of spectator Auger and Auger shake processes and for cascades on the, **79,** 311
Auger spectroscopy
Auger decay of resonantly excited states in atomic Rb, **79,** 303
C 1s and F 1s photoabsorption and subsequent electronic decay of CH_4, CH_3F, CH_2F_2, CHF_3, and CF, **79,** 441
High resolution electron spectroscopy of atoms and molecules, **79,** 247
S-KLL and Cl-KLL spectator Auger decays in monolayered and multilayered molecules, **79,** 215
Spin magnetic moments from angle resolved magnetic circular dichroism in resonant photoemission decay, **78,** 213
Threshold behaviour of L_3–$M_{4,5}M_{4,5}$ Auger transitions in 4d metals, **79,** 223
Auger-free luminescence
Auger-free luminescence in mixed alkali halides, **79,** 117
Autoionization
Differential cross sections for photoionization of He, **79,** 259
High-resolution electron spectrometry of open-shell atoms, **79,** 241
Observation of the $2p^4(^1S)ns$, md excitations in atomic fluorine, **79,** 293
Photoionization study of doubly-excited helium at ultra-high resolution, **79,** 253
The dissociative photoionization of H_2O/D_2O between 20 and 40 eV, **79,** 475
The dissociative photoionization of hydrogen and deuterium via the lowest $^1\Sigma_u^+(Q_2)$ superexcited state, **79,** 373
Autoionization dynamics
Autoionization of acetylene studied by two-dimensional photoelectron spectroscopy, **80,** 1
Autoionization of NO in an excited valence state affected by perturbations from valence–Rydberg mixing, **79,** 395

B K-edge X-ray absorption near-edge structure
B K-edge XANES of crystalline and amorphous inorganic materials, **79,** 71
BaF_2
Decay of core excitons and STE formed at high density in BaF_2 and CsCl single crystals, **79,** 43
BaFBr
Photoelectron and luminescence spectra of BaFCl, BaFBr, and $CsTaF_6$, **79,** 143
BaFCl
Photoelectron and luminescence spectra of BaFCl, BaFBr, and $CsTaF_6$, **79,** 143
Band calculation
Correlation effect in resonant photoemission spectra of UPd_2Al_3 and UC, **78,** 147

Band mapping
A photoemission study of the bandstructure of InSb (100), **78,** 503
Spin- and *k*-dependent electronic structure of ferromagnetic nickel, **78,** 325
Band structure
A photoemission study of the bandstructure of InSb (100), **78,** 503
Angle-resolved photoemission study of $MxTiS_2$ (M = Mn, Fe, Co, Ni; x = 1/3, 1/4), **78,** 477
Soft X-ray emission spectra and band structure in cubic boron nitride, **79,** 191
Barium lead oxide
Core level spectroscopy of $Ba_{n+1}Pb_nO_{3n+1}$, **78,** 159
Biaxially orientated film
Polarized absorption spectra of polyethylene terephthalate and polyethylene naphthalate films in soft X-ray region, **78,** 363
Biological imaging
Confocal imaging using synchrotron radiation, **80,** 343
Bond softening
Covariance mapping and triple coincidence techniques applied to multielectron dissociative ionization, **79,** 367
Boron inorganic material
B K-edge XANES of crystalline and amorphous inorganic materials, **79,** 71
Boron tetrafluoride
Dissociation dynamics of B 1s core-excited BF_3 probed by energy-selected electron–energy-selected ion coincidence and angle-reso, **79,** 411
Bragg crystal
Two dimensionally space-resolved electron temperature measurement of laser created fusion plasmas, **80,** 291
Bremsstrahlung
Photon polarization effects in bremsstrahlung and laser-assisted electron–atom scattering, **79,** 327
Bremsstrahlung spectra
Semi-empirical method for polarizational bremsstrahlung calculation, **79,** 323

C-60
Photoelectron spectroscopy of free fullerenes, **79,** 419
C-70
Photoelectron spectroscopy of free fullerenes, **79,** 419
C_2H_3Cl
Photoionization studies of some small molecules, **79,** 483
C_4H_4S
Structural and electronic properties of adsorbed C_4H_4S on Cu(100) and Ni(100) studied by S K-XAFS and S-1s XPS, **80,** 151
C_{60}
Radiative transitions in C_{60} thin films under SR excitation, **78,** 445
Temperature dependence of luminescence intensity and decay times in C_{60} single crystal, **78,** 449
CaAl
Plasmons in amorphous CaAl alloys determined from photoemission and electron energy loss spectroscopy, **78,** 511
Calcium
Resonant inelastic scattering in localized solid systems by soft X-ray fluorescence spectroscopy, **79,** 139
Carbon contamination
Synchrotron radiation irradiation effects on low-temperature condensed layer of dimethyl aluminum hydride on SiO_2 surface, **80,** 93
Carbonyl sulphide
VUV photofragment excitation spectroscopy: dynamics on dissociative potential surface of OCS, **79,** 433
Cavity QED nonclassical effect
Quantum dynamics of a two-level atom quadratically coupled to a two-mode electromagnetic field, **79,** 319
$CdBr_2$
Decay time studies on UV-luminescence in $CdBr_2$–$CdCl_2$ mixed crystals, **79,** 175
$CdCl_2$
Decay time studies on UV-luminescence in $CdBr_2$–$CdCl_2$ mixed crystals, **79,** 175
Ce
Photoemission study of CeO_2 and $SrCeO_3$, **78,** 179
Theory of resonant inverse photoemission in Ce compounds, **78,** 131
Theory of resonant X-ray emission spectra in Ce compounds, **79,** 183
Ce–Fe alloy
Influence of hybridization in the Magnetic Circular X-ray Dichroism at the Ce-$M_{4,5}$ absorption edges of Ce–Fe systems, **78,** 221
Ce/Fe multilayer
Influence of hybridization in the Magnetic Circular X-ray Dichroism at the Ce-$M_{4,5}$ absorption edges of Ce–Fe systems, **78,** 221
CeF_3
Electronic structure of CeF_3 crystal, **79,** 83
$CHClF_2$
Photoionization studies of some small molecules, **79,** 483
Circular dichroism
Application of photoelectron diffraction theory to circular dichroism and spin-polarized photoelectron emission, **80,** 137

Excitation and ionization of polarized atoms, **79,** 269
Measurement of circular dichroism spectra with a polarizing undulator, **80,** 501
Modified polarizing undulator for measurements of linear and circular dichroisms, **80,** 429
Photoelectron spectroscopy on oriented molecules, **79,** 415
Photon polarization effects in bremsstrahlung and laser-assisted electron–atom scattering, **79,** 327
Circular polarization
Polarization characteristics of polarizing undulator radiation installed in the electron storage ring NIJI-II, **80,** 425
Circular polarized synchrotron radiation
High resolution soft X-ray bending magnet beamline 9.3.2 with circularly polarized radiation capability at the advanced light source, **80,** 401
Circularly polarized X-ray
Characterization of a novel elliptically polarized wiggler, **80,** 433
Cluster
Studies of ion–molecule reactions within clusters $(C_2H_3Cl)_n$, **80,** 33
CO
Neutral photodissociation of CO into excited fragments investigated by dispersed fluorescence spectroscopy, **80,** 21
Co/Pt multilayer
Core-level magnetic circular dichroism in Co/Pt multilayers with varying Co-layer thicknesses, **78,** 271
CO_2
Positive ion–negative ion coincidence spectroscopy of CO_2 for observation of doubly excited Rydberg states, **79,** 487
Cobalt oxide
Spin flip of 3d electrons due to core electron photoionization, **78,** 79
$CoFe_2O_4$
Core-level magnetic circular dichroism in Fe_3O_4 and $CoFe_2O_4$, **78,** 275
Coincidence measurement
Theory of the 4d → 2p and 4f → 4d X-ray emission spectroscopies in rare-earth compound, **79,** 199
Coincidence spectroscopy
Positive ion–negative ion coincidence spectroscopy of CO_2 for observation of doubly excited Rydberg states, **79,** 487
Collisional scheme
Reduction of X-ray laser driver energy, **80,** 255
Compton scattering
Multiple photoionization of free atoms, **78,** 19
Computer simulation
Total photoelectric yields of aluminum thin films near the Al $L_{2,3}$ edge, **79,** 17
Condon factor
Debye–Waller and Condon factors in XAFS, **79,** 25
Conducting polymer
Photoemission study on poly(pyridine-2,5-diyl), poly(2,2′-bipyridine-5,5′-diyl), and their K-doped states, **78,** 399
Configuration interaction
Multiple-Cu-site effects on core-level photoemission spectra for CuO_2 planar systems, **78,** 53
The inclusion of charge transfer to the conduction band in a cluster model analysis of some 3d transition metal chalcogenides, **78,** 111
Configuration-dependent hybridization
Theory of resonant X-ray emission spectra in Ce compounds, **79,** 183
Continuum generation
Intense coherent VUV radiation from a self-trapped ultra-short laser pulse, **80,** 263
Cooper minima
Rotational and vibrational effects in photoionization: Bridging the gap from microvolts to kilovolts, **79,** 361
$CoPt_3$
Fano effect and magnetic circular dichroism in core absorption region of $CoPt_3$, **78,** 267
Core electron absorption spectrum
Polarized absorption spectra of polyethylene terephthalate and polyethylene naphthalate films in soft X-ray region, **78,** 363
Core excitation
Non-radiative decay channels of B 1s core exciton in h-BN, **79,** 211
Polarization study on the B 1s exciton emissions from h-BN and B_2O_3, **79,** 187
Resonant Ni 3p and 3s photoemission for the Ni 2p core-excitation in NiO, **78,** 115
State-specific ion desorption from DCOO/Si(100) by C 1s core excitation, **80,** 121
Core exciton
Surface core exciton of alkali chloride film on Si(100), **80,** 205
Core hole electronic state
Spin flip of 3d electrons due to core electron photoionization, **78,** 79
Core hole
L_3 absorption spectrum of germanium single crystal, **79,** 5
Core level
Si:2p core-level photoexcitation and photoionization of organosilicon molecules, **79,** 499

Spin-resolved photoemission of valence band and core level satellites of Ni, **78,** 311
Yb 3d photoemission spectra of $Yb(Ba_{0.8}Sr_{0.2})_2Cu_3O_7$ and YbF_3, **78,** 187
Core level dependence
Core level dependence of tailing structures in resonant spectra of UC and UB_{12}, **78,** 151
Core-hole effect
Core hole effect in NEXAFS spectroscopy of aromatic hydrocarbons: chrysene, perylene and coronene, **78,** 383
Core-level asymmetry
Core level spectroscopy of $Ba_{n+1}Pb_nO_{3n+1}$, **78,** 159
Core-level spectroscopy
Theoretical studies on core-level spectra of solids, **78,** 7
Correlation effect
Calculations of inner shell transitions in Ca^+, **79,** 307
Core level dependence of tailing structures in resonant spectra of UC and UB_{12}, **78,** 151
Correlation effect in resonant photoemission spectra of UPd_2Al_3 and UC, **78,** 147
COS cell
Observation of the internal membrane system of COS cells by X-ray microscopy, **80,** 369
CoS_2
MCD in core absorption region of CoS_2, **78,** 263
CoSe
First-principles calculation of optical conductivity of FeSe and CoSe, **78,** 91
Coupled-channel Schrödinger equation
Understanding diatomic photodissociation with a coupled-channel Schrödinger equation model, **80,** 9
Cross luminescence
Crossluminescence in ionic crystals, **79,** 111
CrSe
Photoemission and ultraviolet inverse-photoemission studies of CrSe with NiAs-type crystal structure, **78,** 83
CsCl
Decay of core excitons and STE formed at high density in BaF_2 and CsCl single crystals, **79,** 43
CsI
Photoemission, photodesorption and luminescence studies of CsI in the 20–140 eV region, **80,** 109
$CsTaF_6$
Photoelectron and luminescence spectra of BaFCl, BaFBr, and $CsTaF_6$, **79,** 143
Cu
Angle-resolved photoemission extended fine structure: multiple layers of emitters and multiple initial states, **80,** 41
Cu(100)
Structural and electronic properties of adsorbed C_4H_4S on Cu(100) and Ni(100) studied by S K-XAFS and S-1s XPS, **80,** 151
Cu 2p photoemission
Multiple-Cu-site effects on core-level photoemission spectra for CuO_2 planar systems, **78,** 53
Cubic boron nitride
Soft X-ray emission spectra and band structure in cubic boron nitride, **79,** 191

DCNQI
Electron spectroscopic studies of the organic conductors DCNQI (*N*, *N'*-dicyanoquinonediimine)-Cu salts, **78,** 469
High-resolution photoemission study of deutrated dimethyl-dicyanoquinonediimine-Cu compound; $(DMe\text{-}DCNQI)_2Cu$, **78,** 441
Debye–Waller factor
Debye–Waller and Condon factors in XAFS, **79,** 25
Spherical Debye–Waller factors in EXAFS, **79,** 29
Decay time
Temperature dependence of luminescence intensity and decay times in C_{60} single crystal, **78,** 449
Defect stabilization
Multiplication of electronic excitations and formation of radiation defects in alkali halides, **79,** 39
Degradation mechanism
Improvement of the aging characteristics of deuterium lamp, **80,** 493
Density dependence
A cluster model to explain the ionization potential and energy positions of photocurrent structures of anthracene doped in supercritical xenon as a function of, **78,** 415
Density effect
Density dependence of the ionization potential of H_2S in argon, **79,** 463
Deuterium lamp
Improvement of the aging characteristics of deuterium lamp, **80,** 493
Diamond
Synchrotron radiation etching of diamond surfaces in the low pressure atmosphere of O_2 and SF_6, **80,** 77
Diatomic photodissociation
Understanding diatomic photodissociation with a coupled-channel Schrödinger equation model, **80,** 9
Dichroism
Materials science research by synchrotron radiation spectroscopy, **78,** 1
Dielectric screeening
Photoemission and photon screening in layered crystals, **78,** 481
Diffraction grating
Efficiencies of diffraction gratings by an electromagnetic theory, **80,** 477

Mo/Si multilayer coated laminar phase and ruled blaze gratings for the soft X-ray region, **80,** 389
Optimization and evaluation of varied line spacing plane grating monochromators for third-generation synchrotron radiation sources, **80,** 303
Diffusion
A novel analysis method for plasma light and soft X-ray tomography data including the three-dimensional diffusion in a semiconductor detector array, **80,** 279
Diluted magnetic semiconductor
Mn 3d states in diluted magnetic semiconductor $Zn_{1-x}Mn_xTe$, **79,** 13
Photoemission study of Mn–ZnTe(110) interface, **80,** 213
Synchrotron radiation photoemission studies of Fe 3d states in $Cd_{1-x}F_xSe$, **78,** 497
Dimethylaluminium hydride
Synchrotron radiation irradiation effects on low-temperature condensed layer of dimethyl aluminum hydride on SiO_2 surface, **80,** 93
Disorder induced effect
Disorder induced effects on electronic structure of transition metal oxides, **78,** 37
Dissociative ionization
Covariance mapping and triple coincidence techniques applied to multielectron dissociative ionization, **79,** 367
Dissociative photoionization of O_2 in the vuv region studied by photoion kinetic energy spectroscopy, **79,** 471
Dissociative photoionization
Dissociative photoionization of hexacarbonyl tungsten in the range 30–120 eV, **79,** 503
The dissociative photoionization of H_2O/D_2O between 20 and 40 eV, **79,** 475
The dissociative photoionization of hydrogen and deuterium via the lowest $^1\Sigma_u^+(Q_2)$ superexcited state, **79,** 373
Recent results in energy- and angle-resolved double photoionization, **79,** 279
Dissociative photoionization excitation
Excitation function measurements of the dissociative photoionization excitation of N_2, **79,** 467
Doubly excited state
Differential cross sections for photoionization of He, **79,** 259
Dynamic photoionization parameter
Photoionization of an open-shell atom with open-shell final ionic state: A spin-resolved study of photoelectrons above the Tl^+ (6s6p) , **79,** 335

Early transition metal compound
Electron spectroscopies and partial excitation spectra in Cr_2O_3, **78,** 49
EELS
Theory of XAS and EELS in unfilled shell systems, **78,** 119
Electric dipole transition
Magnetic circular X-ray dichroism at pre-peak of Fe K-edge in ferrimagnetic Fe-oxides, **78,** 251
4f Electron
Resonant photoemission study of Gd–Lu and Dy–Lu multilayers, **78,** 67
5f Electron
High-resolution photoemission study of UNi_2Al_3 and URu_2Si_2, **78,** 143
Electron collision
High resolution UV spectroscopy of H_2 and N_2 applied to observations of the planets by spacecraft, **79,** 429
Electron correlation
Cross sections and angular distributions of the photoelectron correlation satellites of the the Xe atom, **79,** 315
Photoionization of atomic antimony: Multitransition calculations in RPAE, **79,** 295
Spectral weight transfer, mass renormalization and chemical potential shift in Mott–Hubbard systems, **78,** 31
Spectroscopic manifestation of mass renormalization in a layered 4d-electron superconductor Sr_2RuO_4, **78,** 175
Electron spectrometry
High-resolution electron spectrometry of open-shell atoms, **79,** 241
Electron spectroscopy
A new approach to the complete experiment of atomic photoionization, **79,** 339
High resolution electron spectroscopy of atoms and molecules, **79,** 247
Observation of the $2p^4(^1S)ns$, md excitations in atomic fluorine, **79,** 293
Electron temperature mapping
Two dimensionally space-resolved electron temperature measurement of laser created fusion plasmas, **80,** 291
Electron–electron scattering
Radiative recombination of electron–hole pairs of solid Xe in the visible spectral range and inelastic scattering of photoelectrons, **79,** 103
Electron–ion coincidence
Dissociation dynamics of B 1s core-excited BF_3 probed by energy-selected electron–energy-selected ion coincidence and angle-reso, **79,** 411
Electronic excitation
Luminescence quenching as a probe for the local density of electronic excitations in insulators, **79,** 147

Electronic relaxation
Time resolved luminescence spectroscopy of wide bandgap insulators, **79,** 99
Electronic state
Surface states and surface umklapp transitions in angle-resolved photoemission from a GaAs($\bar{1}\bar{1}\bar{1}$)-2 × 2 surface, **80,** 201
Electronic structure
A new effect in spin-resolved photoemission from Pt(110) in normal emission by linearly polarized VUV-radiation, **78,** 321
Disorder induced effects on electronic structure of transition metal oxides, **78,** 37
Electronic structure of CeF_3 crystal, **79,** 83
Electronic structure of the $Mn/Cd_{0.96}Zn_{0.04}Te(111)$ interface studied by synchrotron radiation, **80,** 217
Electronic structures of noble metal–Pd binary alloys studied by photoemission using synchrotron radiation, **78,** 43
Electronic structures of polysilanes and related compounds, **78,** 403
Photoemission and ultraviolet inverse-photoemission studies of CrSe with NiAs-type crystal structure, **78,** 83
Polarized VUV absorption and reflection spectra of oriented films of poly(tetrafluoroethylene) $(CF_2)_n$ and its model compound, **78,** 407
Soft X-ray absorption, UV photoemission, and VUV absorption spectroscopic studies of fluorinated fullerenes, **78,** 453
Soft X-ray emission of porous silicon nanostructures, **79,** 135
Study of the electronic structure of disordered Au–Ag alloys using synchrotron radiation, **78,** 127
Synchrotron radiation studies on metal/semiconductor interface electronic structures, **80,** 155
Theory of photoemission spectra for M_2O_3 (M = Ti, V, Cr, Mn, Fe) compounds, **78,** 103
Time resolved luminescence spectroscopy of wide bandgap insulators, **79,** 99
Ellipsometry
Thin film ellipsometry at a photon energy of 97 eV, **80,** 465
Energy loss spectroscopy
The energy loss Spectroscopy of ABO_3 ferroelectrics, **79,** 75
Energy transfer
Energy transfer between Ag^+ and OH^- impurities in $KMgF_3$ crystals, **79,** 95
Epitaxial growth
Structural and electronic properties of As:Ge_n on Si(001) surface, **80,** 169
Etching
Synchrotron radiation etching of diamond surfaces in the low pressure atmosphere of O_2 and SF_6, **80,** 77
EUV radiation
Normal incidence multilayer telescope for galactic EUV observation, **80,** 299
EXAFS
Spherical Debye–Waller factors in EXAFS, **79,** 29
Exchange splitting
Electronic structure of MnY (Y = S, Se, Te), **78,** 87
Excimer laser-assisted film deposition
Preparation of ZnO thin films using undulator and ArF excimer laser, **80,** 97
Excited Li atom
Photoionization of polarized excited Li atoms, **79,** 275
Exciton
Magnetic circular dichroism of excitons in KI and RbI, **78,** 295
Mechanisms of intrinsic and impurity luminescence excitation by synchrotron radiation in wide-gap oxides, **79,** 91
Excitonic energy transfer
Excitonic energy transfer process in Ne–Kr alloy studied by photon stimulated desorption of metastable atoms, **80,** 101
Extreme UV absorption
High resolution vuv photo-absorption cross sections of O_2 near 83.4 nm, **79,** 387
Extrinsic photoconductivity
Density dependence of the ionization potential of H_2S in argon, **79,** 463

Fano effect
Fano effect and magnetic circular dichroism in core absorption region of $CoPt_3$, **78,** 267
Fast intrinsic luminescence
Photoemission, photodesorption and luminescence studies of CsI in the 20–140 eV region, **80,** 109
Fe K-edge
Magnetic circular X-ray dichroism at pre-peak of Fe K-edge in ferrimagnetic Fe-oxides, **78,** 251
Fe
Strong angular effects in reflection MCD measurements of $M_{2,3}$ transitions utilizing a newly developed quadruple reflection polarizer, **80,** 469
$Fe_{16}N_2$
Soft X-ray polarization and magnetic circular dichroism measurement system, **80,** 385
Fe_3O_4
Core-level magnetic circular dichroism in Fe_3O_4 and $CoFe_2O_4$, **78,** 275
Fe_7S_8
Core-level magnetic circular dichroism in Fe_7S_8 and Fe_7Se_8, **78,** 259

Fe_7Se_8
Core-level magnetic circular dichroism in Fe_7S_8 and Fe_7Se_8, **78,** 259
Electronic band structure and photoemission spectra of Fe_7S_8, **78,** 95
Fermi surface mapping
Evolution of the electronic structure with doping in $Bi_2Sr_2CaCu_2O_{8+\delta}$ – Angle resolved phot, **78,** 167
Ferroelectrics
The energy loss Spectroscopy of ABO_3 ferroelectrics, **79,** 75
Ferromagnetic thin film
A new type of magnetic linear dichroism at Fe and Co $M_{2,3}$ edges, **78,** 237
Ferromagnetism
Magnetic circular dichroism observed with resonant X-ray fluorescence, **78,** 307
Magnetic circular X-ray dichroism measurements in 3 keV region: At Pd $L_{2,3}$-edges in 3d transition metals (TM)–Pd alloys (TM = Fe, Co, Ni), **78,** 303
FeSe
First-principles calculation of optical conductivity of FeSe and CoSe, **78,** 91
Field ionization
Density dependence of the ionization potential of H_2S in argon, **79,** 463
Fixed-in-space molecule
Auger decay of fixed-in-space linear molecules, **79,** 437
Fluorescence
Fluorescence detected soft XAS and MCD. Applications to bioinorganic systems, **78,** 225
Magnetic circular X-ray dichroism measurements in 3 keV region: At Pd $L_{2,3}$-edges in 3d transition metals (TM)–Pd alloys (TM = Fe, Co, Ni), **78,** 303
Soft-X-ray-fluorescence and inelastic-light-scattering studies of solids, **79,** 125
Studies of fluorescence from photoexcitation of N_2 and CO_2 in the 28–100 eV region, **80,** 13
Fluorescence excitation spectroscopy
Spectroscopy and dynamics of superexcited molecules as probed by fluorescence measurements, **79,** 423
Fluorescence photon–photoion coincidence measurement
Excitation function measurements of the dissociative photoionization excitation of N_2, **79,** 467
Fluorescence polarization
A new approach to the complete experiment of atomic photoionization, **79,** 339
Fluorescence spectroscopy
Neutral photodissociation of CO into excited fragments investigated by dispersed fluorescence spectroscopy, **80,** 21
Rotational and vibrational effects in photoionization: Bridging the gap from microvolts to kilovolts, **79,** 361
Fluorinated fullerene
Core shell electron binding energy behavior of $C_{60}F_{42}$ molecule on the C_{60} precovered GaAs(100) surface, **78,** 437
Soft X-ray absorption, UV photoemission, and VUV absorption spectroscopic studies of fluorinated fullerenes, **78,** 453
Fluorine-like ion
Spectra and term systems of fluorine-like ions, **79,** 347
Fluoromethane
C 1s and F 1s photoabsorption and subsequent electronic decay of CH_4, CH_3F, CH_2F_2, CHF_3, and CF, **79,** 441
Fluoroperovskites
Energy transfer between Ag^+ and OH^- impurities in $KMgF_3$ crystals, **79,** 95
Forced autoionization
Density and field induced autoionization of NO valence states, **79,** 381
Fourier transform spectroscopy
Design and performance of a soft X-ray interferometer for ultra-high resolution Fourier transform spectroscopy, **80,** 309
Fourth-generation VUV/SXR light source
Some aspects of the design study on a fourth-generation-like VUV/SXR light source, **80,** 505
Fragmentation
Angular correlation between fragment ions from the nitrogen K-shell excited and ionized N_2O, **79,** 491
Si:2p core-level photoexcitation and photoionization of organosilicon molecules, **79,** 499
Free electron laser
Progress of the Super-ACO storage ring Free Electron Laser in the UV as a source for users, **80,** 317
Fresnel zone plate
Biological microscopy and soft X-ray optics at Stony Brook, **80,** 337
Fulgide
Optical studies of photochromic furylfulgide single crystal, **78,** 411
Full Multiple Scattering calculation
Full Multiple Scattering calculations on silicates and oxides at Al K-edge, **79,** 21
Fullerene
Photoelectron spectra of metal fullerenes: Are metal fullerenes molecular crystals or not?, **78,** 493
Photoelectron spectroscopy of free fullerenes, **79,** 419
Photoemission study of K- and Sc-doped C_{84}, **78,** 457
Fusion plasma impurity
Isoelectronic behavior of resonant and intercombination lines in MgI-like ions, **80,** 283

GaAs
$(NH_4)_2S_x$-treated GaAs surfaces studied by soft X-ray photoelectron spectroscopy and S K-edge XANES, **80,** 209
Studies of Mg overlayer on GaAs(100) surface treated by CH_3CSNH_2, **80,** 181
Surface states and surface umklapp transitions in angle-resolved photoemission from a GaAs($\bar{1}\bar{1}\bar{1}$)-2 × 2 surface, **80,** 201
Synchrotron radiation photoelectron spectroscopy study of bonding at heterointerfaces between InAs nanocrystals and Se-terminated GaAs, **80,** 221
GaSb nanocrystal
Initial stages of nanocrystal growth of compound semiconductors on Si substrates, **80,** 129
Photoemission studies of Mg deposition on sulfurized GaSb(100) surface, **80,** 185
GaSb(001)
Photoelectron spectroscopy on reconstructed GaSb(001), **80,** 225
Gd film
Magnetic linear dichroism in spin-resolved Gd 4f photoemission, **78,** 333
Gd–Co
Magnetic circular dichroism of Gd–Co and Gd–Ni alloys in the Gd 3d, 4d and the (Co, Ni) 2p, 3p core excita, **78,** 217
Gd–Ni
Magnetic circular dichroism of Gd–Co and Gd–Ni alloys in the Gd 3d, 4d and the (Co, Ni) 2p, 3p core excita, **78,** 217
Ge
L_3 absorption spectrum of germanium single crystal, **79,** 5
Ge(111)
Photoemission spectroscopy study of the Ge(111) high temperature phase transition, **80,** 45
Ge/ZnS(111)
Synchrotron radiation photoemission study of Ge/ZnS(111) heterojunction, **80,** 197
Ge/ZnSe(100)
Valence band offset and interface formation of Ge/ZnSe(100) studied by synchrotron radiation photoemission, **80,** 193
Ge_xSe_{1-x}
Photoemission and inverse-photoemission studies of glassy Ge_xSe_{1-x}, **78,** 507
4d Giant resonance
4d photoionization of singly-charged Xe, Ba, and Eu ions, **79,** 289

h-BN
Non-radiative decay channels of B 1s core exciton in h-BN, **79,** 211
H_2S
Density dependence of the ionization potential of H_2S in argon, **79,** 463
Halogen atom
High-resolution electron spectrometry of open-shell atoms, **79,** 241
Halogen-containing molecule
Ion-pair formation in halogen-containing molecules via VUV photoexcitation of Rydberg states, **79,** 377
Hartee–Fock approximation
Multiple-Cu-site effects on core-level photoemission spectra for CuO_2 planar systems, **78,** 53
HBr
PFI-ZEKE spectroscopy of the $^2\Pi$ spin–orbit components of HBr^+, **80,** 5
He
Multiple photoionization of free atoms, **78,** 19
Helical undulator
Design of a helical undulator for UVSOR, **80,** 437
Heliotron E
Impurity behaviour in Heliotron E plasmas, **80,** 271
Helium double excitation
Photoionization study of doubly-excited helium at ultra-high resolution, **79,** 253
High density excitation
Decay of core excitons and STE formed at high density in BaF_2 and CsCl single crystals, **79,** 43
High resolution photoemission spectroscopy
High-resolution photoemission study of UNi_2Al_3 and URu_2Si_2, **78,** 143
Temperature dependence of the valence-band photoemission spectra in $YbInCu_4$, **78,** 139
High resolution spectroscopy
High resolution soft X-ray bending magnet beamline 9.3.2 with circularly polarized radiation capability at the advanced light source, **80,** 401
High resolution
High-resolution band-pass photon detector for inverse-photoemission spectroscopy, **80,** 393
High temperature phase transition
Photoemission spectroscopy study of the Ge(111) high temperature phase transition, **80,** 45
High temperature superconducor
Evolution of the electronic structure with doping in $Bi_2Sr_2CaCu_2O_{8+\delta}$ – Angle resolved phot, **78,** 167
Higher fullerene
Photoionization potentials of fullerenes (C_{60}–C_{84}) doped in a nonpolar liquid, **78,** 461
Hydrocarbon
Photoabsorption, photoionization, and neutral-dissociation cross sections of C_2H_6 and C_3H_8 in the extreme-uv region, **79,** 391

Impulse model
Multicoincidence mass spectrometry of core excited molecules, **79,** 401
In/Si(001)
An angle-resolved photoelectron spectroscopy study of the electronic structures of Si(001)2 × 2–Al and –In surfaces, **80,** 177
In/Si(100)
Multiple scattering study of synchrotron radiation photoelectron diffraction from Si(001)2 × 2–In surface, **80,** 147
InAs
Synchrotron radiation photoelectron spectroscopy study of bonding at heterointerfaces between InAs nanocrystals and Se-terminated GaAs, **80,** 221
InN
Optical properties of indium nitride in vacuum ultraviolet region, **79,** 9
Inner-shell
New experiments in photoabsorption studies of singly and multiply charged ions, **79,** 283
Inner-shell excitation
Angular correlation between fragment ions from the nitrogen K-shell excited and ionized N_2O, **79,** 491
Molecular symmetries and vibrations in high-resolution inner-shell spectroscopy, **79,** 351
Auger-electron-photoion coincidence studies on ionic fragmentation following the Si 2p ionization of SiF_4, **79,** 495
Inner-shell transition
Calculations of inner shell transitions in Ca^+, **79,** 307
Inner-valence shell excitation
Studies of fluorescence from photoexcitation of N_2 and CO_2 in the 28–100 eV region, **80,** 13
InSb (100)
A photoemission study of the bandstructure of InSb (100), **78,** 503
Insertion device
Characteristics of figure-8 undulator radiation, **80,** 441
Characterization of a novel elliptically polarized wiggler, **80,** 433
Design of a helical undulator for UVSOR, **80,** 437
Insulator
Luminescence quenching as a probe for the local density of electronic excitations in insulators, **79,** 147
Intercalation
Angle-resolved photoemission study of $MxTiS_2$ (M = Mn, Fe, Co, Ni; x = 1/3, 1/4), **78,** 477
Interface
Electronic structure of the $Mn/Cd_{0.96}Zn_{0.04}Te(111)$ interface studied by synchrotron radiation, **80,** 217
Photoemission study of the Sm/Si(100)2 × 1 interface, **80,** 189
Synchrotron radiation studies on metal/semiconductor interface electronic structures, **80,** 155
Valence electronic structure at the interface of organic thin films, **78,** 387
Interface diffusion
Photoemission and ion scattering study of Ce/Ni(110) and Ce/Cu(110) systems, **80,** 241
Interface structure
Multiple scattering study of synchrotron radiation photoelectron diffraction from Si(001)2 × 2–In surface, **80,** 147
Interfacial electronic structure
The electronic structure of porphyrin/metal interfaces studied by ultraviolet photoelectron spectroscopy, **78,** 359
Interferometry
Design and performance of a soft X-ray interferometer for ultra-high resolution Fourier transform spectroscopy, **80,** 309
Internal membrane system
Observation of the internal membrane system of COS cells by X-ray microscopy, **80,** 369
Intra-beam scattering effect
Some aspects of the design study on a fourth-generation-like VUV/SXR light source, **80,** 505
Inverse photoemission
High-resolution band-pass photon detector for inverse-photoemission spectroscopy, **80,** 393
Photoemission and inverse-photoemission spectra of quasi-two-dimensional Mo_4O_{11}, **78,** 485
Inverse-photoemission spectroscopy
A photoemission and inverse-photoemission study of trigonal Se, **79,** 1
Electronic structure of MnY (Y = S, Se, Te), **78,** 87
Ion
Calculations of inner shell transitions in Ca^+, **79,** 307
New experiments in photoabsorption studies of singly and multiply charged ions, **79,** 283
Ion angular distribution
Multicoincidence mass spectrometry of core excited molecules, **79,** 401
Ion-etched grating
The EUV performance of an ion-etched blazed diffraction grating, **80,** 473
Ion kinetic energy distribution
Kinetic energy released distributions of ions desorbed from H_2O/Si(100) adsorption system by O 1s excitation, **80,** 65
Ion-pair formation
Ion-pair formation in halogen-containing molecules via VUV photoexcitation of Rydberg states, **79,** 377

Ion scattering
Photoemission and ion scattering study of Ce/Ni(110) and Ce/Cu(110) systems, **80,** 241
Ionic crystal
Crossluminescence in ionic crystals, **79,** 111
Ionic Rydberg state
Threshold photoelectron spectrum of O_2 in 31–34 eV region, **79,** 507
Ionization limit
Spectra and term systems of fluorine-like ions, **79,** 347
Ionization potential
A cluster model to explain the ionization potential and energy positions of photocurrent structures of anthracene doped in supercritical xenon as a function of, **78,** 415
Density dependence of the ionization potential of H_2S in argon, **79,** 463
Photoionization potentials of fullerenes (C_{60}–C_{84}) doped in a nonpolar liquid, **78,** 461
Iron chalcogenides
Spin-polarized and spin-integrated photoemission study of itinerant ferrimagnetic iron chalcogenides, **78,** 317
Itinerant magnetism
Spin-polarized and spin-integrated photoemission study of itinerant ferrimagnetic iron chalcogenides, **78,** 317

Jahn–Teller effect
Molecular symmetries and vibrations in high-resolution inner-shell spectroscopy, **79,** 351

K edge absorption
Orbital moments and magnetic circular dichroism at the K edge in 3d transition metals, **78,** 209
KBr
Magnetic circular dichroism study of KBr and RbBr excitons, **78,** 247
KDP family
Intra-ionic transitions of K^+ and Rb^+ ions in KDP, KDA, RDP and RDA crystals, **79,** 51
Kerr rotation
Magneto-optical spectra of bismuth-substituted gadolinium iron garnets in vacuum ultraviolet, **78,** 291
KI
Magnetic circular dichroism of excitons in KI and RbI, **78,** 295
KrI $3d^9np$ resonance
Quantitative investigation of the decay of KrI $3d^9np$ resonances: cross sections of spectator Auger and Auger shake processes and for cascades on the, **79,** 311
Kurchatov SR source
VUV equipment at Kurchatov SR source, **80,** 413

L-line
4d → 2p X-ray emission spectra in rare-earth compounds, **79,** 179
La
La 4d and Mn core absorption magnetic circular dichroism, XPS and inverse photoemission spectroscopy of $La_{1-x}Sr_x$, **78,** 283
$La_{1-x}Sr_xCoO_3$
Electronic structure and magnetism in valence-control $La_{1-x}Sr_xCoO_3$, **78,** 195
La_2CuO_4
Resonant X-ray emission spectra of CuO and La_2CuO_4, **78,** 183
LAPW method
Electronic band structure and photoemission spectra of Fe_7S_8, **78,** 95
Laser ablation
Micro X-ray photoelectron spectroscopy of the laser ablated silicon surface with a laser-produced plasma X-ray source, **80,** 37
Laser fusion
Ultra-fast 2-dimensional X-ray imaging with a 10-ps resolution for use in laser fusion research, **80,** 287
Laser plasma
Measurements of extreme UV yields from Nd–YAG plasmas using a multilayer monochromator, **80,** 295
New experiments in photoabsorption studies of singly and multiply charged ions, **79,** 283
Laser-excited atom
VUV-photoionization of laser-excited atoms, **79,** 263
Laser-produced plasma
Micro X-ray photoelectron spectroscopy of the laser ablated silicon surface with a laser-produced plasma X-ray source, **80,** 37
Observation of polymer alloy by spectral soft X-ray microscopy with a laser plasma X-ray source, **80,** 349
Laser-produced plasma source
Development of a grazing incidence soft X-ray microscope with a laser-produced plasma source, **80,** 357
Lattice defect
VUV spectroscopy study of lattice defect creation in rare gas solids, **79,** 47
Layered crystals
Photoemission and photon screening in layered crystals, **78,** 481
Layered material
The S-*K* and P-*K* polarized absorption spectra of layered thiophosphates MPS_3 (M = Mn, Fe, Ni, Zn, Mg, **79,** 203
Liquid surface
NEXAFS studies on the temperature dependence of surface structure of solid and liquid pentacontane (n-$CH_3(CH_2)48CH_3$), **78,** 367

Low energy electron diffraction
Photoemission study for Mg/Si(111)1 × 1 surface, **80,** 165
Low temperature
Fission and fusion of excitons in perylene crystal studied with VUV and X-ray excitation, **78,** 423
LSI fabrication
Recent progress in synchrotron radiation lithography, **80,** 321
Luminescence
Decay kinetics of exciton luminescence from two coexisting off-center configurations in KCl:I, **79,** 167
Electronic structure of CeF_3 crystal, **79,** 83
Excitation states of RE^{3+}-pentaphosphates in VUV and UV range, **79,** 121
Luminescence from self-trapped excitons in BaFCl–BaFBr solid solutions, **79,** 159
Luminescence quenching as a probe for the local density of electronic excitations in insulators, **79,** 147
Optical luminescence yield spectra of KCl:Tl produced by Cl K- and K K-edge excitations, **79,** 155
Spectroscopic and dynamic aspects on luminescence of tryptophan powders, **78,** 427
Luminescence spectroscopy
Radiative recombination of electron–hole pairs of solid Xe in the visible spectral range and inelastic scattering of photoelectrons, **79,** 103
Time resolved luminescence spectroscopy of wide bandgap insulators, **79,** 99

Magnetic circular dichroism
Application of MCD in 4f photoemission as an element-specific probe for near-surface magnetization in lanthanide materials, **78,** 241
Core-level magnetic circular dichroism in Co/Pt multilayers with varying Co-layer thicknesses, **78,** 271
Core-level magnetic circular dichroism in Fe_3O_4 and $CoFe_2O_4$, **78,** 275
Core-level magnetic circular dichroism in Fe_7S_8 and Fe_7Se_8, **78,** 259
Element-specific magnetic domain imaging based on linear and circular magnetic dichroism in photoabsorption, **78,** 299
Fano effect and magnetic circular dichroism in core absorption region of $CoPt_3$, **78,** 267
La 4d and Mn core absorption magnetic circular dichroism, XPS and inverse photoemission spectroscopy of $La_{1-x}Sr_x$, **78,** 283
Magnetic circular dichroism in the soft X-ray absorption region of several Mn based ferromagnetic alloys, **78,** 287
Magnetic circular dichroism observed with resonant X-ray fluorescence, **78,** 307
Magnetic circular dichroism of excitons in KI and RbI, **78,** 295
Magnetic circular dichroism of Gd–Co and Gd–Ni alloys in the Gd 3d, 4d and the (Co, Ni) 2p, 3p core excita, **78,** 217
Magnetic circular dichroism of transition metal- and rare earth-compounds, **78,** 231
Magnetic circular dichroism study of KBr and RbBr excitons, **78,** 247
Magneto-optical spectra of bismuth-substituted gadolinium iron garnets in vacuum ultraviolet, **78,** 291
MCD in core absorption region of CoS_2, **78,** 263
MCD in soft X-ray absorption of $Nd_2Fe_{14}B$, **78,** 279
Orbital moments and magnetic circular dichroism at the K edge in 3d transition metals, **78,** 209
Soft X-ray polarization and magnetic circular dichroism measurement system, **80,** 385
Strong angular effects in reflection MCD measurements of $M_{2,3}$ transitions utilizing a newly developed quadruple reflection polarizer, **80,** 469
X-ray Photoemission Electron Microscopy: Magnetic circular dichroism imaging and other contrast mechanisms, **78,** 13
Magnet circular dichroism in CoS_2 at the Co $L_{2,3}$ and $M_{2,3}$ core edges, **78,** 255
A new type of magnetic linear dichroism at Fe and Co $M_{2,3}$ edges, **78,** 237
Magnetic linear dichroism in spin-resolved Gd 4f photoemission, **78,** 333
Magnetic circular X-ray dichroism
Magnetic circular X-ray dichroism at pre-peak of Fe K-edge in ferrimagnetic Fe-oxides, **78,** 251
Magnetic spectroscopy
Spin magnetic moments from angle resolved magnetic circular dichroism in resonant photoemission decay, **78,** 213
Magnetocrystalline anisotropy
Spin magnetic moments from angle resolved magnetic circular dichroism in resonant photoemission decay, **78,** 213
Many-body effect
Crossluminescence in ionic crystals, **79,** 111
Many-body perturbation theory
The near threshold photoionization cross section of atomic scandium, **79,** 299
4d Metal
Threshold behaviour of L_3–$M_{4,5}M_{4,5}$ Auger transitions in 4d metals, **79,** 223
Metal fullerene
Photoelectron spectra of metal fullerenes: Are metal fullerenes molecular crystals or not?, **78,** 493
Metal insulator transition
Photoemission and X-ray absorption spectroscopy of $PrNiO_3$, **78,** 191

Metal–insulator effect
Core level spectroscopy of $Ba_{n+1}Pb_nO_{3n+1}$, **78,** 159
Metal–insulator transition
Electron spectroscopic studies of the organic conductors DCNQI (*N*, *N'*-dicyanoquinonediimine)-Cu salts, **78,** 469
Electronic structure of Fe_3O_4 across the Verwey transition, **78,** 99
High-resolution photoemission and X-ray absorption study of quasi-one-dimensional DCNQI-Cu salt, **78,** 473
Metallization
Metallization on piezoelectric ceramics surfaces by synchrotron radiation irradiation, **80,** 81
Mg
Photoemission study for Mg/Si(111)1 × 1 surface, **80,** 165
Microchannel plate
Plasma diagnostics using vacuum ultraviolet radiation and soft X-rays in the GAMMA 10 tandem mirror device, **80,** 275
Microscopy
Element-specific magnetic domain imaging based on linear and circular magnetic dichroism in photoabsorption, **78,** 299
Microstructuring
Photochemical etching with tunable VUV radiation, **80,** 49
Mixed valence
Photoemission study of CeO_2 and $SrCeO_3$, **78,** 179
Mn chalcogenide
Electronic structure of MnY (Y = S, Se, Te), **78,** 87
Mn–ZnTe(110) interface
Photoemission study of Mn–ZnTe(110) interface, **80,** 213
Mn
La 4d and Mn core absorption magnetic circular dichroism, XPS and inverse photoemission spectroscopy of $La_{1-x}Sr_x$, **78,** 283
Magnetic circular dichroism in the soft X-ray absorption region of several Mn based ferromagnetic alloys, **78,** 287
Mo_4O_{11}
Photoemission and inverse-photoemission spectra of quasi-two-dimensional Mo_4O_{11}, **78,** 485
Modulation spectroscopy
Magneto-optical spectra of bismuth-substituted gadolinium iron garnets in vacuum ultraviolet, **78,** 291
Measurement of circular dichroism spectra with a polarizing undulator, **80,** 501
Molecular alignment
NEXAFS studies on the rubbing effects of the surface structure of polyimides, **78,** 371
Molecular orientation
NEXAFS spectroscopic studies of molecular orientation in α-sexithienyl evaporated thin films on metal films, **78,** 379
Molecular photoelectron spectroscopy
A high resolution study of the photelectron angular distributions and branching ratios for the carbon dioxide molecule in the wavelength region 685–79579, 511
Molecular photoionization
Rotational and vibrational effects in photoionization: Bridging the gap from microvolts to kilovolts, **79,** 361
Studies of decay processes following valence and core shell excitation of small molecules, **79,** 479
Molecular spectroscopy
Tunable vacuum ultraviolet laser – ideal light for spectroscopy of atoms, molecules, and clusters, **80,** 267
Monochromatic X-ray imaging
Two dimensionally space-resolved electron temperature measurement of laser created fusion plasmas, **80,** 291
Mulilayer X-ray mirror
Measurements of extreme UV yields from Nd–YAG plasmas using a multilayer monochromator, **80,** 295
Multi-imaging X-ray streak technique
Ultra-fast 2-dimensional X-ray imaging with a 10-ps resolution for use in laser fusion research, **80,** 287
Multicoincidence
Multicoincidence mass spectrometry of core excited molecules, **79,** 401
Multilayer
Angle-resolved photoemission extended fine structure: multiple layers of emitters and multiple initial states, **80,** 41
Application of multilayers to VUV and X-ray astronomy, **80,** 375
Mo/Si multilayer coated laminar phase and ruled blaze gratings for the soft X-ray region, **80,** 389
Monochromatizing phase modulation multilayer zone plates, **80,** 373
Platinum carbon multilayer grating: preparation and characterization, **80,** 497
Resonant photoemission study of Gd–Lu and Dy–Lu multilayers, **78,** 67
The EUV performance of an ion-etched blazed diffraction grating, **80,** 473
Thermal stability of Mo/C/Si/C multilayer soft X-ray mirrors, **80,** 381
Thermal stablity of nickel–carbon XUV multilayers, **80,** 453

Multilayer mirror
Multilayer EUV/X-ray polychromators for plasma diagnostics, **80,** 259
Multilayer sputter deposition stress control, **80,** 461
Multilayered grating
Application of multilayers to VUV and X-ray astronomy, **80,** 375
Multiphoton ionization
Covariance mapping and triple coincidence techniques applied to multielectron dissociative ionization, **79,** 367
Multiple electronic excitation
Double core excitation at the sulfur K edge in H_2S, SO_2 and SF_6, **79,** 357
Multiplication of electronic excitation
Multiplication of electronic excitations and formation of radiation defects in alkali halides, **79,** 39
Multiply charge molecule
Studies of fluorescence from photoexcitation of N_2 and CO_2 in the 28–100 eV region, **80,** 13

N_2
Excitation energy dynamics observed in N_2 Auger spectra near the K-shell threshold, **79,** 445
Excitation function measurements of the dissociative photoionization excitation of N_2, **79,** 467
N_2O
Angular correlation between fragment ions from the nitrogen K-shell excited and ionized N_2O, **79,** 491
Neutral dissociation of N_2O in superexcited states, **80,** 25
Na halide
Photon-energy dependence of excited-state Na desorption from Na halides by synchrotron radiation, **80,** 113
$NaNO_2$
Optical spectra of thallous halides in 5d core exciton region, **79,** 59
VUV reflection spectra of ferroelectric $NaNO_2$, **79,** 55
Nanocrystal
Synchrotron radiation photoelectron spectroscopy study of bonding at heterointerfaces between InAs nanocrystals and Se-terminated GaAs, **80,** 221
Nanostructure
Soft X-ray emission of porous silicon nanostructures, **79,** 135
Ne $2p^4$ LS state dependence
Recent results in energy- and angle-resolved double photoionization, **79,** 279
Ne/Kr alloy
Excitonic energy transfer process in Ne–Kr alloy studied by photon stimulated desorption of metastable atoms, **80,** 101
Near edge X-ray absorption fine structure (NEXAFS)
Orientation and desorption of oxygen admolecules on a Pt(113) stepped surface, **80,** 105
NEXAFS spectroscopic studies of molecular orientation in α-sexithienyl evaporated thin films on metal films, **78,** 379
Neopentane
Resonant processes in the gas-phase photoemission of neopentane with variable photon energy, **79,** 457
Neutral dissociation
Neutral dissociation of N_2O in superexcited states, **80,** 25
Spectroscopy and dynamics of superexcited molecules as probed by fluorescence measurements, **79,** 423
Neutral photodissociation
Neutral photodissociation of CO into excited fragments investigated by dispersed fluorescence spectroscopy, **80,** 21
NEXAFS
Core hole effect in NEXAFS spectroscopy of aromatic hydrocarbons: chrysene, perylene and coronene, **78,** 383
NEXAFS studies on the rubbing effects of the surface structure of polyimides, **78,** 371
NEXAFS studies on the temperature dependence of surface structure of solid and liquid pentacontane (n-$CH_3(CH_2)48CH_3$), **78,** 367
Polarized NEXAFS studies on the mechanical rubbing effect of poly(tetrafluoroethylene) oligomer and its model compound, **78,** 375
Soft X-ray absorption, UV photoemission, and VUV absorption spectroscopic studies of fluorinated fullerenes, **78,** 453
Ni
Spin-resolved core-level photoemission spectra of ferromagnetic nickel, **78,** 329
Spin-resolved photoemission of valence band and core level satellites of Ni, **78,** 311
Ni(100)
Structural and electronic properties of adsorbed C_4H_4S on Cu(100) and Ni(100) studied by S K-XAFS and S-1s XPS, **80,** 151
Ni/C
Interface roughness and density characterization of multilayer mirrors by using X-ray standing waves, **80,** 449
Nickel
Spin polarization of valence band satellites of nickel, **78,** 341
Spin- and k-dependent electronic structure of ferromagnetic nickel, **78,** 325
NiO
Resonant Ni 3p and 3s photoemission for the Ni 2p core-excitation in NiO, **78,** 115

Niobium carbide
Core level study of NbC(100) and NbN(100), **80,** 237
Niobium nitride
Core level study of NbC(100) and NbN(100), **80,** 237
NO
Autoionization of NO in an excited valence state affected by perturbations from valence–Rydberg mixing, **79,** 395
Density and field induced autoionization of NO valence states, **79,** 381
Photon-stimulated desorption study of the NO/Si(111) surface, **80,** 125
Nonlinear atom–field coupling
Quantum dynamics of a two-level atom quadratically coupled to a two-mode electromagnetic field, **79,** 319
Nonpolar liquid
Photoionization potentials of fullerenes (C_{60}–C_{84}) doped in a nonpolar liquid, **78,** 461
Normal incidence multilayer telescope
Normal incidence multilayer telescope for galactic EUV observation, **80,** 299

O_2
Indirect predissociation of the $3p7\pi_u$ f $^1\Sigma^+{}_u$ state o, **80,** 17
Narrow-bandwidth VUV laser measurements of fine-structure predissociation linewidths in the Schumann–Runge bands of O_2, **80,** 29
Spin–orbit interactions between Rydberg states of O_2, **79,** 449
Threshold photoelectron spectrum of O_2 in 31–34 eV region, **79,** 507
Understanding diatomic photodissociation with a coupled-channel Schrödinger equation model, **80,** 9
O_2 Absorption cross section
High resolution vuv photo-absorption cross sections of O_2 near 83.4 nm, **79,** 387
3d Occupation number
Electron spectroscopies and partial excitation spectra in Cr_2O_3, **78,** 49
Off-center self-trapping exciton
Emission spectra and decay characteristics in photostimulated $(CnH_{2n+1}NH3)_2CdCl_4$: n = 1, 2, 3, **79,** 163
Oligomer
Angle-resolved ultraviolet photoelectron spectroscopy of oriented film of model compound of poly(*p*-phenylene): wave number(k)-conservation and, **78,** 395
Open-shell atom
High-resolution electron spectrometry of open-shell atoms, **79,** 241
Optical conductivity
First-principles calculation of optical conductivity of FeSe and CoSe, **78,** 91
Optical EXAFS
Optical luminescence yield spectra of KCl:Tl produced by Cl K- and K K-edge excitations, **79,** 155
Optical property
Optical properties of indium nitride in vacuum ultraviolet region, **79,** 9
Optical property
Optical studies of photochromic furylfulgide single crystal, **78,** 411
UV reflection spectra of anatase TiO_2, **78,** 75
Orbital magnetic moment
Core-level magnetic circular dichroism in Co/Pt multilayers with varying Co-layer thicknesses, **78,** 271
Orbital moment
Orbital moments and magnetic circular dichroism at the K edge in 3d transition metals, **78,** 209
Organic conductor
High-resolution photoemission study of deutrated dimethyl-dicyanoquinonediimine-Cu compound; $(DMe\text{-}DCNQI)_2Cu$, **78,** 441
Organic film
Angle-resolved UPS of ultrathin films of functional organic molecules with synchrotron radiation: Determination of molecular orientation by quantitative analysi, **78,** 345
Organic material
Interpretation of complicated NEXAFS spectra by comparison with Xα-SW calculations, **78,** 351
Organic thin film
Angle-resolved photoemission from oriented thin films of naphthacene: comparison with theoretical spectra, **78,** 391
Organosilicon compound
Synchrotron radiation induced reactions of condensed layer of organosilicon compounds, **80,** 89
Organosilicon molecule
Si:2p core-level photoexcitation and photoionization of organosilicon molecules, **79,** 499
Orientation of *n*-alkane
NEXAFS studies on the temperature dependence of surface structure of solid and liquid pentacontane (n-$CH_3(CH_2)48CH_3$), **78,** 367
Oriented molecule
Photoelectron spectroscopy on oriented molecules, **79,** 415
Outermost core
Lattice relaxation in Auger decay-free core luminescence, **79,** 219
Oxide superconductor
Fermi surface and gap symmetry of $Bi_2Sr_2CaCu_2O_8$: a status report, **78,** 163

High-resolution angle-resolved photoemission study of non cuprate two-dimensional superconductor Sr_2RuO_4, **78,** 171
Oxygen admolecule
Orientation and desorption of oxygen admolecules on a Pt(113) stepped surface, **80,** 105
Oxynitride film
Stoichiometry reversal and depth-profiling in the growth of thin oxynitride films with N_2O on Si(100) surfaces, **80,** 133

P-*K* absorption
The S-*K* and P-*K* polarized absorption spectra of layered thiophosphates MPS_3 (M = Mn, Fe, Ni, Zn, Mg, **79,** 203
Partial densities of states (PDOS)
Electron spectroscopies and partial excitation spectra in Cr_2O_3, **78,** 49
Passivation
Studies of Mg overlayer on GaAs(100) surface treated by CH_3CSNH_2, **80,** 181
$PbBr_2$
Luminescence due to dimer type self-trapped excitons in lead halides, **79,** 171
$PbCl_2$
Luminescence due to dimer type self-trapped excitons in lead halides, **79,** 171
PCl
Core attraction v.s. electron–electron repulsion in the lopsided energy sharing between a photoelectron and an Auger electron, **79,** 237
Perovskite
High-resolution angle-resolved photoemission study of non cuprate two-dimensional superconductor Sr_2RuO_4, **78,** 171
Perovskite-type Ni oxide
Photoemission and X-ray absorption spectroscopy of $PrNiO_3$, **78,** 191
PFI-ZEKE spectroscopy
PFI-ZEKE spectroscopy of the $^2\Pi$ spin–orbit components of HBr^+, **80,** 5
Phase transition
High-resolution photoemission study of deutrated dimethyl-dicyanoquinonediimine-Cu compound; $(DMe\text{-}DCNQI)_2Cu$, **78,** 441
The energy loss Spectroscopy of ABO_3 ferroelectrics, **79,** 75
Photo etching
Synchrotron radiation excited etching of silicon surface studied by velocity distribution measurements of desorbed species, **80,** 73
Photoabsorption
New experiments in photoabsorption studies of singly and multiply charged ions, **79,** 283
Photoabsorption cross section
High resolution vuv photo-absorption cross sections of O_2 near 83.4 nm, **79,** 387
Photoabsorption, photoionization, and neutral-dissociation cross sections of C_2H_6 and C_3H_8 in the extreme-uv region, **79,** 391
Photoabsorption spectroscopy
Stoichiometry reversal and depth-profiling in the growth of thin oxynitride films with N_2O on Si(100) surfaces, **80,** 133
Photochemical etching
Photochemical etching with tunable VUV radiation, **80,** 49
Photochromism
Optical studies of photochromic furylfulgide single crystal, **78,** 411
Photodesorption
Relaxation of selectively excited atoms at the surface of rare-gas doped rare-gas solids, **80,** 61
Photodiode
Stable silicon photodiodes for absolute intensity measurements in the VUV and soft X-ray regions, **80,** 313
Photodissociation reaction
Tunable vacuum ultraviolet laser – ideal light for spectroscopy of atoms, molecules, and clusters, **80,** 267
Photoelectric angular distribution
Excitation and ionization of polarized atoms, **79,** 269
Photoelectron
Core attraction v.s. electron–electron repulsion in the lopsided energy sharing between a photoelectron and an Auger electron, **79,** 237
Photoelectron diffraction
Application of photoelectron diffraction theory to circular dichroism and spin-polarized photoelectron emission, **80,** 137
Multiple scattering study of synchrotron radiation photoelectron diffraction from Si(001)2 × 2–In surface, **80,** 147
Photoelectron intensity oscillation
Band-dispersion-originated photoelectron intensity oscillations during Si epitaxial growth on Si(100), **80,** 173
Photoelectron microscope
Study of the X-ray microbeam for scanning microscopes, **80,** 353
Study of the X-ray microbeam for scanning microscopes, **80,** 353
Photoelectron scattering
Angle-resolved photoemission from oriented thin films of naphthacene: comparison with theoretical spectra, **78,** 391

Photoelectron spectroscopy
An angle-resolved photoelectron spectroscopy study of the electronic structures of Si(001)2 × 2–Al and –In surfaces, **80,** 177
Angle-resolved UPS of ultrathin films of functional organic molecules with synchrotron radiation: Determination of molecular orientation by quantitative analysi, **78,** 345
Autoionization of acetylene studied by two-dimensional photoelectron spectroscopy, **80,** 1
Autoionization of NO in an excited valence state affected by perturbations from valence–Rydberg mixing, **79,** 395
Beamline 4B9B and photoemission spectroscopy station in BSRF, **80,** 409
Core level study of NbC(100) and NbN(100), **80,** 237
Core shell electron binding energy behavior of $C_{60}F_{42}$ molecule on the C_{60} precovered GaAs(100) surface, **78,** 437
Cross sections and angular distributions of the photoelectron correlation satellites of the the Xe atom, **79,** 315
Electronic structure of Fe_3O_4 across the Verwey transition, **78,** 99
Electronic structures of noble metal–Pd binary alloys studied by photoemission using synchrotron radiation, **78,** 43
Fermi surface and gap symmetry of $Bi_2Sr_2CaCu_2O_8$: a status report, **78,** 163
Initial stages of nanocrystal growth of compound semiconductors on Si substrates, **80,** 129
Photoelectron spectroscopy on oriented molecules, **79,** 415
Photoelectron spectroscopy on reconstructed GaSb(001), **80,** 225
Photoemission and ion scattering study of Ce/Ni(110) and Ce/Cu(110) systems, **80,** 241
Photoemission study of copper deposition on the conjugated polymer poly-3-hexylthiophene and comparison with quantum-chemical calculations, **78,** 355
Photoemission study of the Sm/Si(100)2 × 1 interface, **80,** 189
Resonant processes in the gas-phase photoemission of neopentane with variable photon energy, **79,** 457
Spectator Auger transitions of resonantly-excited Sr 2p core-holes in ionic strontium compounds, **79,** 229
Studies of Mg overlayer on GaAs(100) surface treated by CH_3CSNH_2, **80,** 181
Surface states and surface umklapp transitions in angle-resolved photoemission from a GaAs($\bar{1}\bar{1}\bar{1}$)-2 × 2 surface, **80,** 201
Synchrotron radiation photoelectron spectroscopy study of bonding at heterointerfaces between InAs nanocrystals and Se-terminated GaAs, **80,** 221
Synchrotron radiation studies on metal/semiconductor interface electronic structures, **80,** 155
The inclusion of charge transfer to the conduction band in a cluster model analysis of some 3d transition metal chalcogenides, **78,** 111
Vacuum UV photoelectron dynamics in alkali earth fluorides: yield, Auger effect, and luminescence, **79,** 151
VUV-photoionization of laser-excited atoms, **79,** 263
Photoemission
Angle-resolved photoemission extended fine structure: multiple layers of emitters and multiple initial states, **80,** 41
Concluding remarks on the VUV 11 conference, **80,** 513
Core-level photoemission study of the Si(111)4 × 1–In surface, **80,** 233
Materials science research by synchrotron radiation spectroscopy, **78,** 1
Photoemission and inverse-photoemission spectra of quasi-two-dimensional Mo_4O_{11}, **78,** 485
Photoemission and inverse-photoemission studies of glassy Ge_xSe_{1-x}, **78,** 507
Photoemission and photon screening in layered crystals, **78,** 481
Photoemission study of K- and Sc-doped C_{84}, **78,** 457
Photoemission study of Mn–ZnTe(110) interface, **80,** 213
Photoemission study on poly(pyridine-2,5-diyl), poly(2,2′-bipyridine-5,5′-diyl), and their K-doped states, **78,** 399
Photoemission, photodesorption and luminescence studies of CsI in the 20–140 eV region, **80,** 109
Progress in understanding VUV photoemission in low-dimensionality systems, **78,** 431
Two-dimensional angular distribution of photoemission spectra from the valence band of 1T-TaS_2, **78,** 489
Photoemission diffraction
Angle-resolved photoemission extended fine structure: multiple layers of emitters and multiple initial states, **80,** 41
Photoemission spectroscopy
A photoemission and inverse-photoemission study of trigonal Se, **79,** 1
Application of MCD in 4f photoemission as an element-specific probe for near-surface magnetization in lanthanide materials, **78,** 241
Electron spectroscopic studies of the organic conductors DCNQI (*N*, *N*′-dicyanoquinonediimine)-Cu salts, **78,** 469

Electronic structure and magnetism in valence-control $La_{1-x}Sr_xCoO_3$, **78,** 195
Electronic structure of MnY (Y = S, Se, Te), **78,** 87
High-resolution photoemission and X-ray absorption study of quasi-one-dimensional DCNQI-Cu salt, **78,** 473
High-resolution photoemission study of deutrated dimethyl-dicyanoquinonediimine-Cu compound; $(DMe\text{-}DCNQI)_2Cu$, **78,** 441
Photoemission and inverse photoemission studies on actinide materials – does any model work?, **78,** 57
Photoemission and X-ray absorption spectroscopy of $PrNiO_3$, **78,** 191
Photoemission spectroscopy study of the Ge(111) high temperature phase transition, **80,** 45
Spectral weight transfer, mass renormalization and chemical potential shift in Mott–Hubbard systems, **78,** 31
Spectroscopic manifestation of mass renormalization in a layered 4d-electron superconductor Sr_2RuO_4, **78,** 175
Spin-polarized and spin-integrated photoemission study of itinerant ferrimagnetic iron chalcogenides, **78,** 317
Photoemission structure factor
Unusual photoelectron angular distribution of Kish graphite, **78,** 465
Photofragment excitation spectroscopy
VUV photofragment excitation spectroscopy: dynamics on dissociative potential surface of OCS, **79,** 433
Photoion kinetic energy spectroscopy
Dissociative photoionization of O_2 in the vuv region studied by photoion kinetic energy spectroscopy, **79,** 471
Photoion spectrometry
4d photoionization of singly-charged Xe, Ba, and Eu ions, **79,** 289
Dissociation dynamics of B 1s core-excited BF_3 probed by energy-selected electron–energy-selected ion coincidence and angle-reso, **79,** 411
Photoionization
Auger decay of fixed-in-space linear molecules, **79,** 437
Cross sections and angular distributions of the photoelectron correlation satellites of the the Xe atom, **79,** 315
Differential cross sections for photoionization of He, **79,** 259
Photoionization cross section of aromatic molecules in liquid alkanes, **78,** 419
Photoionization of an open-shell atom with open-shell final ionic state: A spin-resolved study of photoelectrons above the Tl^+ (6s6p) , **79,** 335
Photoionization of atomic antimony: Multitransition calculations in RPAE, **79,** 295
Photoionization studies of some small molecules, **79,** 483
Studies of ion–molecule reactions within clusters $(C_2H_3Cl)_n$, **80,** 33
Photoionization cross section
Photoabsorption, photoionization, and neutral-dissociation cross sections of C_2H_6 and C_3H_8 in the extreme-uv region, **79,** 391
Photoelectron spectroscopy of free fullerenes, **79,** 419
Photoionization cross section of aromatic molecules in liquid alkanes, **78,** 419
The near threshold photoionization cross section of atomic scandium, **79,** 299
Photoionization of ions
4d photoionization of singly-charged Xe, Ba, and Eu ions, **79,** 289
Photoluminescence
Luminescence of SR irradiated fused quartz, **79,** 67
Mechanisms of intrinsic and impurity luminescence excitation by synchrotron radiation in wide-gap oxides, **79,** 91
Multiplication of electronic excitations and formation of radiation defects in alkali halides, **79,** 39
Relaxation of selectively excited atoms at the surface of rare-gas doped rare-gas solids, **80,** 61
Photon detector
High-resolution band-pass photon detector for inverse-photoemission spectroscopy, **80,** 393
Photon stimulated desorption
Excitonic energy transfer process in Ne–Kr alloy studied by photon stimulated desorption of metastable atoms, **80,** 101
Photon-stimulated desorption study of the NO/Si(111) surface, **80,** 125
Photon stimulated ion desorption
Kinetic energy released distributions of ions desorbed from H_2O/Si(100) adsorption system by O 1s excitation, **80,** 65
Photon-energy dependence
Photon-energy dependence of excited-state Na desorption from Na halides by synchrotron radiation, **80,** 113
Photon-stimulated ion desorption
State-specific ion desorption from DCOO/Si(100) by C 1s core excitation, **80,** 121
Photostimulated desorption
Photoemission, photodesorption and luminescence studies of CsI in the 20–140 eV region, **80,** 109
Synchrotron radiation induced reactions of condensed layer of organosilicon compounds, **80,** 89

Photoyield spectroscopy
A new type of magnetic linear dichroism at Fe and Co $M_{2,3}$ edges, **78,** 237
Plasma impurity
Impurity behaviour in Heliotron E plasmas, **80,** 271
Plasma radiometry
Multilayer EUV/X-ray polychromators for plasma diagnostics, **80,** 259
Plasma spectroscopy
Multilayer EUV/X-ray polychromators for plasma diagnostics, **80,** 259
Plasma
A novel analysis method for plasma light and soft X-ray tomography data including the three-dimensional diffusion in a semiconductor detector array, **80,** 279
Plasma diagnostics using vacuum ultraviolet radiation and soft X-rays in the GAMMA 10 tandem mirror device, **80,** 275
Plasmon
Plasmons in amorphous CaAl alloys determined from photoemission and electron energy loss spectroscopy, **78,** 511
Platinum
A new effect in spin-resolved photoemission from Pt(110) in normal emission by linearly polarized VUV-radiation, **78,** 321
Pohang light source
Commissioning and performance of the Pohang Light Source, **80,** 445
Polarization
Polarization study on the B 1s exciton emissions from h-BN and B_2O_3, **79,** 187
Polarized absorption
The S-*K* and P-*K* polarized absorption spectra of layered thiophosphates MPS_3 (M = Mn, Fe, Ni, Zn, Mg, **79,** 203
Polarized target atom
Excitation and ionization of polarized atoms, **79,** 269
Polarizing undulator
Modified polarizing undulator for measurements of linear and circular dichroisms, **80,** 429
Polarizing undulator
Polarization characteristics of polarizing undulator radiation installed in the electron storage ring NIJI-II, **80,** 425
Poly(tetrafluoroethylene)
Polarized NEXAFS studies on the mechanical rubbing effect of poly(tetrafluoroethylene) oligomer and its model compound, **78,** 375
Polarized VUV absorption and reflection spectra of oriented films of poly(tetrafluoroethylene) $(CF_2)_n$ and its model compound, **78,** 407
Poly-tetrafluoroethylene
Exchange reactions on solid surface induced by VUV undulator radiation, **80,** 85
Polyimide
NEXAFS studies on the rubbing effects of the surface structure of polyimides, **78,** 371
Polymer alloy
Observation of polymer alloy by spectral soft X-ray microscopy with a laser plasma X-ray source, **80,** 349
Polymer metallization
Photoemission study of copper deposition on the conjugated polymer poly-3-hexylthiophene and comparison with quantum-chemical calculations, **78,** 355
Polymer
Site specific photochemical reaction of PMMA and related polymers by inner shell electron excitation, **80,** 117
Polysilane
Electronic structures of polysilanes and related compounds, **78,** 403
Polythiophene
Photoemission study of copper deposition on the conjugated polymer poly-3-hexylthiophene and comparison with quantum-chemical calculations, **78,** 355
Porous silicon
Soft X-ray emission of porous silicon nanostructures, **79,** 135
VUV induced luminescence from porous silicon, **79,** 233
Porphyrin
The electronic structure of porphyrin/metal interfaces studied by ultraviolet photoelectron spectroscopy, **78,** 359
Positive/negative ion mass spectrometry
Ion-pair formation in halogen-containing molecules via VUV photoexcitation of Rydberg states, **79,** 377
Post-collision interaction
Core attraction v.s. electron–electron repulsion in the lopsided energy sharing between a photoelectron and an Auger electron, **79,** 237
Pr_2O_3
Mixed valence of praseodymium oxides, **78,** 135
Predissociation
Indirect predissociation of the $3p7\pi_u$ f $^1\Sigma^+{}_u$ state o, **80,** 17
Narrow-bandwidth VUV laser measurements of fine-structure predissociation linewidths in the Schumann–Runge bands of O_2, **80,** 29
PrO_2
Mixed valence of praseodymium oxides, **78,** 135
Profilometer
A profilometer for Synchrotron Radiation Mirrors, **80,** 481

Development and performance of a profilometer for measurement of mirror surface figure, **80,** 485
Protein
Fluorescence detected soft XAS and MCD. Applications to bioinorganic systems, **78,** 225
Pu
Photoemission and inverse photoemission studies on actinide materials – does any model work?, **78,** 57
Pump probe spectroscopy
Intense coherent VUV radiation from a self-trapped ultra-short laser pulse, **80,** 263
Pyroxene
Detection of order–disorder in pyroxenes of the jadeite–diopside series via XAS at the Ca–Na and Mg–Al K-edges, **79,** 79
Pyrrhotite
Electronic band structure and photoemission spectra of Fe_7S_8, **78,** 95
PZT
Metallization on piezoelectric ceramics surfaces by synchrotron radiation irradiation, **80,** 81

Quadruple reflection polarizer
Strong angular effects in reflection MCD measurements of $M_{2,3}$ transitions utilizing a newly developed quadruple reflection polarizer, **80,** 469
Quantum chemistry
Double core excitation at the sulfur K edge in H_2S, SO_2 and SF_6, **79,** 357
Quasi-one-dimensional organic conductor
High-resolution photoemission and X-ray absorption study of quasi-one-dimensional DCNQI-Cu salt, **78,** 473
Quasi-one-dimensional system
Progress in understanding VUV photoemission in low-dimensionality systems, **78,** 431
Quasi-two-dimensional metal
Photoemission and inverse-photoemission spectra of quasi-two-dimensional Mo_4O_{11}, **78,** 485

Radiative transition
Radiative transitions in C_{60} thin films under SR excitation, **78,** 445
Raman scattering
Resonant soft X-ray fluorescence study of rutile (TiO_2), **79,** 195
Random phase approximation
Photoionization of atomic antimony: Multitransition calculations in RPAE, **79,** 295
Rare earth iron garnet
Magneto-optical spectra of bismuth-substituted gadolinium iron garnets in vacuum ultraviolet, **78,** 291
Rare earth
Magnetic circular dichroism of transition metal- and rare earth-compounds, **78,** 231
MCD in soft X-ray absorption of $Nd_2Fe_{14}B$, **78,** 279
Rare gas
Resonance-enhanced two-photon ionization of He and Xe using a mode-locked Ar^+ laser synchronized to VUV synchrotron radiation pulses, **79,** 343
VUV spectroscopy study of lattice defect creation in rare gas solids, **79,** 47
Rare-earth compound
4d → 2p X-ray emission spectra in rare-earth compounds, **79,** 179
Rare-earth metal
Theoretical studies on core-level spectra of solids, **78,** 7
Rare-earth pentaphosphate
Excitation states of RE^{3+}-pentaphosphates in VUV and UV range, **79,** 121
Rare-earth
Selection rule in resonant photoemission in rare earths, **78,** 63
Theory of the 4d → 2p and 4f → 4d X-ray emission spectroscopies in rare-earth compound, **79,** 199
Theory of XAS and EELS in unfilled shell systems, **78,** 119
Rare-gas solid
Radiative recombination of electron–hole pairs of solid Xe in the visible spectral range and inelastic scattering of photoelectrons, **79,** 103
RbBr
Magnetic circular dichroism study of KBr and RbBr excitons, **78,** 247
RbI
Magnetic circular dichroism of excitons in KI and RbI, **78,** 295
Recombination luminescence
Luminescence due to dimer type self-trapped excitons in lead halides, **79,** 171
Recombination scheme
Reduction of X-ray laser driver energy, **80,** 255
Reflectivity
Magneto-optical spectra of bismuth-substituted gadolinium iron garnets in vacuum ultraviolet, **78,** 291
Reflectivity
Mixed valence of praseodymium oxides, **78,** 135
Reflection spectra and optical constants of noncrystalline SiO_2 in the soft X-ray region, **79,** 63
Relaxation dynamics
Decay kinetics of exciton luminescence from two coexisting off-center configurations in KCl:I, **79,** 167
Time-resolved luminescence study on relaxation dynamics and morphology of self-trapped excitons in ionic crystals, **79,** 33

Resistivity
Progress in understanding VUV photoemission in low-dimensionality systems, **78,** 431
Resonance Auger spectroscopy
High resolution electron spectroscopy of atoms and molecules, **79,** 247
Resonance photoemission
Resonant photoemission study of Gd–Lu and Dy–Lu multilayers, **78,** 67
Resonance X-ray emission spectroscopy
Theory of resonant X-ray emission spectra in Ce compounds, **79,** 183
Resonant Auger
Resonant Auger spectra of Y, YF_3 and YCl_3 in Y L_{III} absorption edge, **78,** 123
Soft X-ray resonant Raman and resonant Auger spectra in Si-*K* absorption edge, **79,** 207
Resonant emission
Resonant inelastic scattering in localized solid systems by soft X-ray fluorescence spectroscopy, **79,** 139
Resonant inverse photoemission
Theory of resonant inverse photoemission in Ce compounds, **78,** 131
Resonant photoemission
Core level dependence of tailing structures in resonant spectra of UC and UB_{12}, **78,** 151
Correlation effect in resonant photoemission spectra of UPd_2Al_3 and UC, **78,** 147
Non-radiative decay channels of B 1s core exciton in h-BN, **79,** 211
Photoemission study of CeO_2 and $SrCeO_3$, **78,** 179
Resonant Ni 3p and 3s photoemission for the Ni 2p core-excitation in NiO, **78,** 115
Resonant photoemission in titanium metal, **78,** 71
Selection rule in resonant photoemission in rare earths, **78,** 63
Spectator Auger transitions of resonantly-excited Sr 2p core-holes in ionic strontium compounds, **79,** 229
Spin-resolved photoemission of valence band and core level satellites of Ni, **78,** 311
Resonance-enhanced two-photon ionization of He and Xe using a mode-locked Ar^+ laser synchronized to VUV synchrotron radiation pulses, **79,** 343
Resonant X-ray emission
Resonant X-ray emission spectra of CuO and La_2CuO_4, **78,** 183
Resonant X-ray fluorescence
Magnetic circular dichroism observed with resonant X-ray fluorescence, **78,** 307
Soft X-ray emission spectroscopy in the nineties, **78,** 25
Rubbing effect
Polarized NEXAFS studies on the mechanical rubbing effect of poly(tetrafluoroethylene) oligomer and its model compound, **78,** 375
Rubidium
Auger decay of resonantly excited states in atomic Rb, **79,** 303
Rydberg state
Resonance-enhanced two-photon ionization of He and Xe using a mode-locked Ar^+ laser synchronized to VUV synchrotron radiation pulses, **79,** 343
Spin–orbit interactions between Rydberg states of O_2, **79,** 449
Rydberg–valence interaction
Indirect predissociation of the $3p7\pi_u$ f $^1\Sigma^+{}_u$ state o, **80,** 17

S K-edge
$(NH_4)_2S_x$-treated GaAs surfaces studied by soft X-ray photoelectron spectroscopy and S K-edge XANES, **80,** 209
S-*K* absorption
The S-*K* and P-*K* polarized absorption spectra of layered thiophosphates MPS_3 (M = Mn, Fe, Ni, Zn, Mg, **79,** 203
Satellite
Spin polarization of valence band satellites of nickel, **78,** 341
Scandium atom
The near threshold photoionization cross section of atomic scandium, **79,** 299
Schwarzschild objective
Study of the X-ray microbeam for scanning microscopes, **80,** 353
Se passivation
Initial stages of nanocrystal growth of compound semiconductors on Si substrates, **80,** 129
Selection rule
Selection rule in resonant photoemission in rare earths, **78,** 63
Selective desorption
Metallization on piezoelectric ceramics surfaces by synchrotron radiation irradiation, **80,** 81
Self-trapped exciton
Decay kinetics of exciton luminescence from two coexisting off-center configurations in KCl:I, **79,** 167
Emission spectra and decay characteristics in photostimulated $(CnH_{2n+1}NH3)_2CdCl_4$: n = 1, 2, 3, **79,** 163
Luminescence from self-trapped excitons in BaFCl–BaFBr solid solutions, **79,** 159
Semiconductor
Soft-X-ray-fluorescence and inelastic-light-scattering studies of solids, **79,** 125
Semiconductor detector
A novel analysis method for plasma light and soft

X-ray tomography data including the three-dimensional diffusion in a semiconductor detector array, **80,** 279
Semiempirical calculation
Spectra and term systems of fluorine-like ions, **79,** 347
α-sexithienyl
NEXAFS spectroscopic studies of molecular orientation in α-sexithienyl evaporated thin films on metal films, **78,** 379
SF_6
Studies of decay processes following valence and core shell excitation of small molecules, **79,** 479
Shape resonance
Resonant processes in the gas-phase photoemission of neopentane with variable photon energy, **79,** 457
Si
State-specific ion desorption from DCOO/Si(100) by C 1s core excitation, **80,** 121
Synchrotron radiation excited etching of silicon surface studied by velocity distribution measurements of desorbed species, **80,** 73
Si(001)
Structural and electronic properties of As:Ge_n on Si(001) surface, **80,** 169
Band-dispersion-originated photoelectron intensity oscillations during Si epitaxial growth on Si(100), **80,** 173
Stoichiometry reversal and depth-profiling in the growth of thin oxynitride films with N_2O on Si(100) surfaces, **80,** 133
Si(111)
Photoemission study for Mg/Si(111)1 × 1 surface, **80,** 165
Photon-stimulated desorption study of the NO/Si(111) surface, **80,** 125
Surface core level shifts of the Au adsorbed Si(111) reconstructed surfaces, **80,** 229
Si(111)4 × 1–In
Core-level photoemission study of the Si(111)4 × 1–In surface, **80,** 233
Si-*K* absorption edge
Soft X-ray resonant Raman and resonant Auger spectra in Si-*K* absorption edge, **79,** 207
SiC mirror
Aspherically bent SiC mirror: bending test, **80,** 489
SiF_4
Auger-electron-photoion coincidence studies on ionic fragmentation following the Si 2p ionization of SiF_4, **79,** 495
Silica glass
Improvement of the aging characteristics of deuterium lamp, **80,** 493
Single crystal
Temperature dependence of luminescence intensity and decay times in C_{60} single crystal, **78,** 449
SiO_2
Luminescence of SR irradiated fused quartz, **79,** 67
Reflection spectra and optical constants of non-crystalline SiO_2 in the soft X-ray region, **79,** 63
Site-specific fragmentation
Symmetry effects in site-specific fragmentation of carbon dioxide, **79,** 407
Site-specific reaction
Site specific photochemical reaction of PMMA and related polymers by inner shell electron excitation, **80,** 117
Soft X-ray absorption spectroscopy
Detection of order–disorder in pyroxenes of the jadeite–diopside series via XAS at the Ca–Na and Mg–Al K-edges, **79,** 79
Magnetic circular dichroism in the soft X-ray absorption region of several Mn based ferromagnetic alloys, **78,** 287
Soft X-ray bending magnet beamline
High resolution soft X-ray bending magnet beamline 9.3.2 with circularly polarized radiation capability at the advanced light source, **80,** 401
Soft X-ray crystal monochromator
Recent performances of the soft X-ray crystal monochromator stations BL-2A and BL-11B with new focusing mirrors at the Photon Factory, **80,** 405
Soft X-ray detector
Stable silicon photodiodes for absolute intensity measurements in the VUV and soft X-ray regions, **80,** 313
Soft X-ray emission spectroscopy
Soft X-ray emission spectra and band structure in cubic boron nitride, **79,** 191
Soft X-ray emission
Polarization study on the B 1s exciton emissions from h-BN and B_2O_3, **79,** 187
Resonant soft X-ray fluorescence study of rutile (TiO_2), **79,** 195
Soft X-ray emission spectroscopy in the nineties, **78,** 25
Soft-X-ray-fluorescence and inelastic-light-scattering studies of solids, **79,** 125
Soft X-ray excitation
Symmetry effects in site-specific fragmentation of carbon dioxide, **79,** 407
Soft X-ray high resolution spectroscopy
Optimization and evaluation of varied line spacing plane grating monochromators for third-generation synchrotron radiation sources, **80,** 303

Soft X-ray microbeam
Soft X-ray scanning photoelectron microscope using Wolter-type focusing mirror, **80,** 361
Soft X-ray microscope
Development of a grazing incidence soft X-ray microscope with a laser-produced plasma source, **80,** 357
Soft X-ray microscope with zone plate at UVSOR, **80,** 365
Soft X-ray optics
Mo/Si multilayer coated laminar phase and ruled blaze gratings for the soft X-ray region, **80,** 389
Soft X-ray photoelectron spectroscopy
$(NH_4)_2S_x$-treated GaAs surfaces studied by soft X-ray photoelectron spectroscopy and S K-edge XANES, **80,** 209
Soft X-ray photoemission spectroscopy
Antimony adsorption on III–V(110) surfaces: growth and structure studied by photoemission and photoelectron diffraction, **80,** 143
Soft X-ray photoemission
Total photoelectric yields of aluminum thin films near the Al $L_{2,3}$ edge, **79,** 17
Soft X-ray polarization
Soft X-ray polarization and magnetic circular dichroism measurement system, **80,** 385
Soft X-ray spectromicroscopy
Soft X-ray spectromicroscopy, **80,** 329
Soft X-ray synchrotron radiation
Excitation energy dynamics observed in N_2 Auger spectra near the K-shell threshold, **79,** 445
Spectral soft X-ray
Observation of polymer alloy by spectral soft X-ray microscopy with a laser plasma X-ray source, **80,** 349
Spectroscopy
Concluding remarks on the VUV 11 conference, **80,** 513
Spherical wave effect
Spherical Debye–Waller factors in EXAFS, **79,** 29
Spin polarization
Application of photoelectron diffraction theory to circular dichroism and spin-polarized photoelectron emission, **80,** 137
Spin polarized photoemission
Spin-resolved core-level photoemission spectra of ferromagnetic nickel, **78,** 329
Spin–orbit interaction
Spin–orbit interactions between Rydberg states of O_2, **79,** 449
Spin-resolved photoelectron spectroscopy
Magnetic linear dichroism in spin-resolved Gd 4f photoemission, **78,** 333
Spin-resolved photoemission
A new effect in spin-resolved photoemission from Pt(110) in normal emission by linearly polarized VUV-radiation, **78,** 321
Spin polarization of valence band satellites of nickel, **78,** 341
Spin- and *k*-dependent electronic structure of ferromagnetic nickel, **78,** 325
Spin-resolved photoemission of valence band and core level satellites of Ni, **78,** 311
Sputter deposition
Multilayer sputter deposition stress control, **80,** 461
Sr_2RuO_4
High-resolution angle-resolved photoemission study of non cuprate two-dimensional superconductor Sr_2RuO_4, **78,** 171
Spectroscopic manifestation of mass renormalization in a layered 4d-electron superconductor Sr_2RuO_4, **78,** 175
$SrTiO_3$
Ultraviolet photoemission study of $Sr_{1-x}La_xTiO_3$, **78,** 199
Storage ring free electron laser
Progress of the Super-ACO storage ring Free Electron Laser in the UV as a source for users, **80,** 317
Strontium compound
Spectator Auger transitions of resonantly-excited Sr 2p core-holes in ionic strontium compounds, **79,** 229
Sulfur dioxide
Adsorption of SO_2 on Ni(100) and Ni(111) surfaces, **80,** 161
Adsorption of SO_2 on Ni(110) studied by S K-edge XAFS, **80,** 245
Sum rule
Spin magnetic moments from angle resolved magnetic circular dichroism in resonant photoemission decay, **78,** 213
Superconductor
Progress in understanding VUV photoemission in low-dimensionality systems, **78,** 431
Superconducting gap
Fermi surface and gap symmetry of $Bi_2Sr_2CaCu_2O_8$: a status report, **78,** 163
Superconducting wiggler
Construction and commissioning of a superconducting wiggler for the UVSOR storage ring, **80,** 421
Superexcited molecule
Dissociative photoionization of O_2 in the vuv region studied by photoion kinetic energy spectroscopy, **79,** 471
Spectroscopy and dynamics of superexcited molecules as probed by fluorescence measurements, **79,** 423
Superexcited state
Neutral dissociation of N_2O in superexcited states, **80,** 25

Positive ion–negative ion coincidence spectroscopy of CO_2 for observation of doubly excited Rydberg states, **79,** 487
Surface core level lift
Surface core level shifts of the Au adsorbed Si(111) reconstructed surfaces, **80,** 229
Core level study of NbC(100) and NbN(100), **80,** 237
Core-level photoemission study of the Si(111)4 × 1–In surface, **80,** 233
Surface exciton
Surface core exciton of alkali chloride film on Si(100), **80,** 205
Surface figure
Development and performance of a profilometer for measurement of mirror surface figure, **80,** 485
Surface photochemistry
Kinetic energy released distributions of ions desorbed from H_2O/Si(100) adsorption system by O 1s excitation, **80,** 65
Site-specific, synchrotron radiation induced surface photochemistry, **80,** 55
Surface reaction
Exchange reactions on solid surface induced by VUV undulator radiation, **80,** 85
State-specific ion desorption from DCOO/Si(100) by C 1s core excitation, **80,** 121
Surface state
An angle-resolved photoelectron spectroscopy study of the electronic structures of Si(001)2 × 2–Al and –In surfaces, **80,** 177
Relaxation of selectively excited atoms at the surface of rare-gas doped rare-gas solids, **80,** 61
Surface states and surface umklapp transitions in angle-resolved photoemission from a GaAs($\bar{1}\bar{1}\bar{1}$)-2 × 2 surface, **80,** 201
Surface structure
Adsorption of SO_2 on Ni(100) and Ni(111) surfaces, **80,** 161
Adsorption of SO_2 on Ni(110) studied by S K-edge XAFS, **80,** 245
Synchroton induced optical luminescence
VUV induced luminescence from porous silicon, **79,** 233
Synchroton radiation
Angle-resolved UPS of ultrathin films of functional organic molecules with synchrotron radiation: Determination of molecular orientation by quantitative analysi, **78,** 345
Beamline 4B9B and photoemission spectroscopy station in BSRF, **80,** 409
Construction and commissioning of a superconducting wiggler for the UVSOR storage ring, **80,** 421
Electronic structure of the Mn/$Cd_{0.96}Zn_{0.04}$Te(111) interface studied by synchrotron radiation, **80,** 217
Mechanisms of intrinsic and impurity luminescence excitation by synchrotron radiation in wide-gap oxides, **79,** 91
Photoemission studies of Mg deposition on sulfurized GaSb(100) surface, **80,** 185
Photoionization study of doubly-excited helium at ultra-high resolution, **79,** 253
Platinum carbon multilayer grating: preparation and characterization, **80,** 497
Radiative transitions in C_{60} thin films under SR excitation, **78,** 445
Resonant processes in the gas-phase photoemission of neopentane with variable photon energy, **79,** 457
S-KLL and Cl-KLL spectator Auger decays in monolayered and multilayered molecules, **79,** 215
Synchrotron radiation photoemission studies of Fe 3d states in $Cd_{1-x}F_xSe$, **78,** 497
Aspherically bent SiC mirror: bending test, **80,** 489
Augerdecayofresonantlyexcitedstatesinatomic Rb, **79,** 303
Commissioning and performance of the Pohang Light Source, **80,** 445
Ion-pair formation in halogen-containing molecules via VUV photoexcitation of Rydberg states, **79,** 377
Luminescence of SR irradiated fused quartz, **79,** 67
Materials science research by synchrotron radiation spectroscopy, **78,** 1
Optical properties of indium nitride in vacuum ultraviolet region, **79,** 9
Photochemical etching with tunable VUV radiation, **80,** 49
Photoemission study for Mg/Si(111)1 × 1 surface, **80,** 165
Photoemission study on poly(pyridine-2,5-diyl), poly(2,2′-bipyridine-5,5′-diyl), and their K-doped states, **78,** 399
Recent performances of the soft X-ray crystal monochromator stations BL-2A and BL-11B with new focusing mirrors at the Photon Factory, **80,** 405
Reflection spectra and optical constants of noncrystalline SiO_2 in the soft X-ray region, **79,** 63
Resonant photoemission in titanium metal, **78,** 71
Site-specific, synchrotron radiation induced surface photochemistry, **80,** 55
Spectroscopic and dynamic aspects on luminescence of tryptophan powders, **78,** 427
Study of the electronic structure of disordered Au–Ag alloys using synchrotron radiation, **78,** 127
Synchrotron radiation etching of diamond surfaces in the low pressure atmosphere of O_2 and SF_6, **80,** 77
Synchrotron radiation excited etching of silicon

surface studied by velocity distribution measurements of desorbed species, **80,** 73
Synchrotron radiation induced reactions of condensed layer of organosilicon compounds, **80,** 89
Synchrotron radiation irradiation effects on low-temperature condensed layer of dimethyl aluminum hydride on SiO_2 surface, **80,** 93
Synchrotron radiation photoelectron spectroscopy study of bonding at heterointerfaces between InAs nanocrystals and Se-terminated GaAs, **80,** 221
Synchrotron radiation photoemission study of Ge/ZnS(111) heterojunction, **80,** 197
Temperature-dependent photoabsorption cross sections of selected molecular systems, **79,** 453
Thermoluminescence of BaF_2:RE(Ce, Dy, Eu) crystals, **79,** 87
Two-dimensional angular distribution of photoemission spectra from the valence band of 1T-TaS_2, **78,** 489
Valence band offset and interface formation of Ge/ZnSe(100) studied by synchrotron radiation photoemission, **80,** 193
VUV equipment at Kurchatov SR source, **80,** 413

Synchrotron radiation beamline
Optimization and evaluation of varied line spacing plane grating monochromators for third-generation synchrotron radiation sources, **80,** 303

Synchrotron radiation diagnostics
Characterization of a novel elliptically polarized wiggler, **80,** 433

Synchrotron radiation imaging
Confocal imaging using synchrotron radiation, **80,** 343

Synchrotron radiation lithography
Recent progress in synchrotron radiation lithography, **80,** 321

Synchrotron radiation mirror
A profilometer for Synchrotron Radiation Mirrors, **80,** 481

Synthetic multilayer mirror
Spectroscopic diagnostics on low aspect-ratio tokamaks, **80,** 249

1T-TaS_2
Two-dimensional angular distribution of photoemission spectra from the valence band of 1T-TaS_2, **78,** 489

Temperature dependent photoabsorption cross section
Temperature-dependent photoabsorption cross sections of selected molecular systems, **79,** 453

Thallium atom
Photoionization of an open-shell atom with open-shell final ionic state: A spin-resolved study of photoelectrons above the Tl^+ (6s6p) , **79,** 335

Thermal stability
Thermal stability of Mo/C/Si/C multilayer soft X-ray mirrors, **80,** 381

Thermoluminescence
Thermoluminescence of BaF_2:RE(Ce, Dy, Eu) crystals, **79,** 87

Thin film
A photoemission study of ultrathin uranium layers on noble metals, **78,** 155
Core shell electron binding energy behavior of $C_{60}F_{42}$ molecule on the C_{60} precovered GaAs(100) surface, **78,** 437
Radiative transitions in C_{60} thin films under SR excitation, **78,** 445
Si K and Co L_3 XANES study of thin-film $CoSi_2$, **78,** 107
Site specific photochemical reaction of PMMA and related polymers by inner shell electron excitation, **80,** 117
Thin film ellipsometry at a photon energy of 97 eV, **80,** 465
Valence electronic structure at the interface of organic thin films, **78,** 387

Third continuum
Third molecular continuum in VUV radiation of solid Ar, **79,** 107

3d Threshold
Theory of resonant inverse photoemission in Ce compounds, **78,** 131

Threshold Auger spectroscopy
Threshold behaviour of L_3–$M_{4,5}M_{4,5}$ Auger transitions in 4d metals, **79,** 223

Threshold photoelectron spectroscopy
Threshold photoelectron spectrum of O_2 in 31–34 eV region, **79,** 507

Ti-L absorption
Soft X-ray absorption spectroscopy in 100–1000 eV region at the ALS, **80,** 509

Time of flight
Photon-stimulated desorption study of the NO/Si(111) surface, **80,** 125

Time of flight mass spectroscopy
Studies of decay processes following valence and core shell excitation of small molecules, **79,** 479

Time-resolved fluorescence
Fission and fusion of excitons in perylene crystal studied with VUV and X-ray excitation, **78,** 423

Time-resolved spectroscopy
Time-resolved luminescence study on relaxation dynamics and morphology of self-trapped excitons in ionic crystals, **79,** 33

TiO_2
Resonant soft X-ray fluorescence study of rutile (TiO_2), **79,** 195

UV reflection spectra of anatase TiO_2, **78,** 75
Titanium metal
Resonant photoemission in titanium metal, **78,** 71
Total electron yield
Polarized absorption spectra of polyethylene terephthalate and polyethylene naphthalate films in soft X-ray region, **78,** 363
Touschek lifetime
Some aspects of the design study on a fourth-generation-like VUV/SXR light source, **80,** 505
Transition metal
Magnetic circular dichroism of transition metal- and rare earth-compounds, **78,** 231
3d Transition metal
Orbital moments and magnetic circular dichroism at the K edge in 3d transition metals, **78,** 209
3d Transition metal chalcogenide
The inclusion of charge transfer to the conduction band in a cluster model analysis of some 3d transition metal chalcogenides, **78,** 111
Transition metal compound
Soft-X-ray-fluorescence and inelastic-light-scattering studies of solids, **79,** 125
Theory of photoemission spectra for M_2O_3 (M = Ti, V, Cr, Mn, Fe) compounds, **78,** 103
Transition metal oxide
Disorder induced effects on electronic structure of transition metal oxides, **78,** 37
Spectral weight transfer, mass renormalization and chemical potential shift in Mott–Hubbard systems, **78,** 31
Spin flip of 3d electrons due to core electron photoionization, **78,** 79
Transition-metal compound
Theoretical studies on core-level spectra of solids, **78,** 7
Trigonal Se
A photoemission and inverse-photoemission study of trigonal Se, **79,** 1
Triple-differential cross section
Recent results in energy- and angle-resolved double photoionization, **79,** 279
Tryptopham
Fission and fusion of excitons in perylene crystal studied with VUV and X-ray excitation, **78,** 423
Spectroscopic and dynamic aspects on luminescence of tryptophan powders, **78,** 427
Tunable vacuum ultraviolet laser
Tunable vacuum ultraviolet laser – ideal light for spectroscopy of atoms, molecules, and clusters, **80,** 267
VUV photofragment excitation spectroscopy: dynamics on dissociative potential surface of OCS, **79,** 433
Tunneling recombination luminescence
Emission spectra and decay characteristics in photostimulated $(C_nH_{2n+1}NH3)_2CdCl_4$: n = 1, 2, 3, **79,** 163
Two-photon two-mode process
Quantum dynamics of a two-level atom quadratically coupled to a two-mode electromagnetic field, **79,** 319

UAl_2
Photoemission and inverse photoemission studies on actinide materials – does any model work?, **78,** 57
Ultra-fast X-ray imaging
Ultra-fast 2-dimensional X-ray imaging with a 10-ps resolution for use in laser fusion research, **80,** 287
Ultrashort pulse laser
Intense coherent VUV radiation from a self-trapped ultra-short laser pulse, **80,** 263
Ultrasoft X-ray
Multilayer X-ray interference mirrors in the ultrasoft X-ray region, **80,** 457
Ultrathin film
Application of MCD in 4f photoemission as an element-specific probe for near-surface magnetization in lanthanide materials, **78,** 241
Ultraviolet
Concluding remarks on the VUV 11 conference, **80,** 513
Ultraviolet confocal imaging
Confocal imaging using synchrotron radiation, **80,** 343
Ultraviolet inverse-photoemission spectroscopy
Photoemission and ultraviolet inverse-photoemission studies of CrSe with NiAs-type crystal structure, **78,** 83
Ultraviolet photoelectron spectroscopy
Band-dispersion-originated photoelectron intensity oscillations during Si epitaxial growth on Si(100), **80,** 173
Electronic structures of polysilanes and related compounds, **78,** 403
Photoelectron spectra of metal fullerenes: Are metal fullerenes molecular crystals or not?, **78,** 493
The electronic structure of porphyrin/metal interfaces studied by ultraviolet photoelectron spectroscopy, **78,** 359
Ultraviolet photoemission
Ultraviolet photoemission study of $Sr_{1-x}La_xTiO_3$, **78,** 199
Ultraviolet photoemission spectroscopy
Angle-resolved ultraviolet photoelectron spectroscopy of oriented film of model compound of poly(*p*-phenylene): wave number(k)-conservation and, **78,** 395
Photoemission and inverse-photoemission studies of glassy Ge_xSe_{1-x}, **78,** 507

Synchrotron radiation photoemission studies of Fe 3d states in $Cd_{1-x}F_xSe$, **78,** 497
Valence electronic structure at the interface of organic thin films, **78,** 387
Ultraviolet photoluminescence
Vacuum UV photoelectron dynamics in alkali earth fluorides: yield, Auger effect, and luminescence, **79,** 151
Ultraviolet reflection spectrum
UV reflection spectra of anatase TiO_2, **78,** 75
Undulator
Measurement of circular dichroism spectra with a polarizing undulator, **80,** 501
Undulator beamline
Recent performances of the soft X-ray crystal monochromator stations BL-2A and BL-11B with new focusing mirrors at the Photon Factory, **80,** 405
Undulator radiation
Exchange reactions on solid surface induced by VUV undulator radiation, **80,** 85
Photo-induced structural change in a-SiO_2 with undulator radiation, **80,** 69
UV detector calibration based on ESR using undulator radiation, **80,** 397
Undulator radiation-assisted film deposition
Preparation of ZnO thin films using undulator and ArF excimer laser, **80,** 97
Uranium
A photoemission study of ultrathin uranium layers on noble metals, **78,** 155
Uranium compound
High-resolution photoemission study of UNi_2Al_3 and URu_2Si_2, **78,** 143
UV inverse-photoemission spectroscopy
Mn 3d states in diluted magnetic semiconductor $Zn_{1-x}Mn_xTe$, **79,** 13
UV photoemission spectroscopy
High resolution UV spectroscopy of H_2 and N_2 applied to observations of the planets by spacecraft, **79,** 429
Isoelectronic behavior of resonant and intercombination lines in MgI-like ions, **80,** 283
Mn 3d states in diluted magnetic semiconductor $Zn_{1-x}Mn_xTe$, **79,** 13
UV-luminescence
Decay time studies on UV-luminescence in $CdBr_2$–$CdCl_2$ mixed crystals, **79,** 175
UVSOR
Design of a helical undulator for UVSOR, **80,** 437

Vacuum ultraviolet plasma spectroscopy
Spectroscopic diagnostics on low aspect-ratio tokamaks, **80,** 249
Vacuum ultraviolet spectroscopy
Density and field induced autoionization of NO valence states, **79,** 381
Valence band
Spin-resolved photoemission of valence band and core level satellites of Ni, **78,** 311
Temperature dependence of the valence-band photoemission spectra in $YbInCu_4$, **78,** 139
Valence photoemission
Photoelectron spectroscopy of free fullerenes, **79,** 419
Valence state
Density and field induced autoionization of NO valence states, **79,** 381
Resonant X-ray emission spectra of CuO and La_2CuO_4, **78,** 183
Vibronic coupling
Molecular symmetries and vibrations in high-resolution inner-shell spectroscopy, **79,** 351
Vibronic structure
Optical spectra of thallous halides in 5d core exciton region, **79,** 59
VUV reflection spectra of ferroelectric $NaNO_2$, **79,** 55
VUV
Stable silicon photodiodes for absolute intensity measurements in the VUV and soft X-ray regions, **80,** 313
VUV absorption
Polarized VUV absorption and reflection spectra of oriented films of poly(tetrafluoroethylene) $(CF_2)_n$ and its model compound, **78,** 407
VUV light source
Characteristics of figure-8 undulator radiation, **80,** 441
VUV reflection spectroscopy
Optical spectra of thallous halides in 5d core exciton region, **79,** 59
VUV reflection spectra of ferroelectric $NaNO_2$, **79,** 55
VUV scattering
Circular dichroism in VUV- and X-ray atom scattering caused by virtual photoionization, **79,** 331
VUV spectroscopy
Impurity behaviour in Heliotron E plasmas, **80,** 271
Indirect predissociation of the $3p7\pi_u$ f $^1\Sigma^+{}_u$ state o, **80,** 17
Intra-ionic transitions of K^+ and Rb^+ ions in KDP, KDA, RDP and RDA crystals, **79,** 51
Narrow-bandwidth VUV laser measurements of fine-structure predissociation linewidths in the Schumann–Runge bands of O_2, **80,** 29
VUV spectroscopy study of lattice defect creation in rare gas solids, **79,** 47

Energy transfer between Ag^+ and OH^- impurities in $KMgF_3$ crystals, **79,** 95
VUV–UV light source
Intense coherent VUV radiation from a self-trapped ultra-short laser pulse, **80,** 263
VUV-photoionization
VUV-photoionization of laser-excited atoms, **79,** 263

Water
The dissociative photoionization of H_2O/D_2O between 20 and 40 eV, **79,** 475
Wavenumber conservation
Angle-resolved ultraviolet photoelectron spectroscopy of oriented film of model compound of poly(*p*-phenylene): wave number(*k*)-conservation and, **78,** 395
Wide-gap oxide
Mechanisms of intrinsic and impurity luminescence excitation by synchrotron radiation in wide-gap oxides, **79,** 91
Wolter mirror
Development of a grazing incidence soft X-ray microscope with a laser-produced plasma source, **80,** 357
Wolter-type mirror
Soft X-ray scanning photoelectron microscope using Wolter-type focusing mirror, **80,** 361

Xα-scattered-wave calculation
Interpretation of complicated NEXAFS spectra by comparison with Xα-SW calculations, **78,** 351
X-ray absorption fine structure spectroscopy
Adsorption of SO_2 on Ni(100) and Ni(111) surfaces, **80,** 161
Adsorption of SO_2 on Ni(110) studied by S K-edge XAFS, **80,** 245
X-ray absorption fine structure
Debye–Waller and Condon factors in XAFS, **79,** 25
X-ray absorption fine-structure spectroscopy
X-ray Photoemission Electron Microscopy: Magnetic circular dichroism imaging and other contrast mechanisms, **78,** 13
X-ray absorption near edge structure
$(NH_4)_2S_x$-treated GaAs surfaces studied by soft X-ray photoelectron spectroscopy and S K-edge XANES, **80,** 209
Si K and Co L_3 XANES study of thin-film $CoSi_2$, **78,** 107
X-ray absorption spectra
C 1s and F 1s photoabsorption and subsequent electronic decay of CH_4, CH_3F, CH_2F_2, CHF_3, and CF, **79,** 441
X-ray absorption spectroscopy
Design and performance of a soft X-ray interferometer for ultra-high resolution Fourier transform spectroscopy, **80,** 309
Double core excitation at the sulfur K edge in H_2S, SO_2 and SF_6, **79,** 357
Full Multiple Scattering calculations on silicates and oxides at Al K-edge, **79,** 21
Photoemission and X-ray absorption spectroscopy of $PrNiO_3$, **78,** 191
Soft X-ray absorption spectroscopy in 100–1000 eV region at the ALS, **80,** 509
X-ray resonant inelastic scattering, **79,** 131
X-ray absorption spectrum
Interpretation of complicated NEXAFS spectra by comparison with Xα-SW calculations, **78,** 351
X-ray diffraction
Thermal stablity of nickel–carbon XUV multilayers, **80,** 453
X-ray emission spectroscopy
4d → 2p X-ray emission spectra in rare-earth compounds, **79,** 179
Theory of the 4d → 2p and 4f → 4d X-ray emission spectroscopies in rare-earth compound, **79,** 199
X-ray resonant inelastic scattering, **79,** 131
X-ray fluorescence
Resonant inelastic scattering in localized solid systems by soft X-ray fluorescence spectroscopy, **79,** 139
X-ray inelastic scattering
X-ray resonant inelastic scattering, **79,** 131
X-ray interference mirror
Multilayer X-ray interference mirrors in the ultrasoft X-ray region, **80,** 457
X-ray laser
Reduction of X-ray laser driver energy, **80,** 255
X-ray lithography
Recent progress in synchrotron radiation lithography, **80,** 321
X-ray magnetic circular dichroism
Fluorescence detected soft XAS and MCD. Applications to bioinorganic systems, **78,** 225
Influence of hybridization in the Magnetic Circular X-ray Dichroism at the Ce-$M_{4,5}$ absorption edges of Ce–Fe systems, **78,** 221
Magnetic circular X-ray dichroism measurements in 3 keV region: At Pd $L_{2,3}$-edges in 3d transition metals (TM)–Pd alloys (TM = Fe, Co, Ni), **78,** 303
X-ray magnetic circular dichroism spectra and distortions at Fe^{2+} $L_{2,3}$ edges, **78,** 337
XMCD measurements in a high T_c molecular based magnet, **78,** 203
X-ray microscopy
Biological microscopy and soft X-ray optics at Stony Brook, **80,** 337
Observation of the internal membrane system of COS cells by X-ray microscopy, **80,** 369

X-ray mirror
Thermal stability of Mo/C/Si/C multilayer soft X-ray mirrors, **80,** 381
X-ray multilayer mirror
Interface roughness and density characterization of multilayer mirrors by using X-ray standing waves, **80,** 449
X-ray optics
Multilayer sputter deposition stress control, **80,** 461
X-ray photoelectron spectroscopy
Micro X-ray photoelectron spectroscopy of the laser ablated silicon surface with a laser-produced plasma X-ray source, **80,** 37
X-ray photoemission electron microscope
X-ray Photoemission Electron Microscopy: Magnetic circular dichroism imaging and other contrast mechanisms, **78,** 13
X-ray photoemission spectroscopy
A photoemission study of ultrathin uranium layers on noble metals, **78,** 155
Soft X-ray scanning photoelectron microscope using Wolter-type focusing mirror, **80,** 361
Theory of photoemission spectra for M_2O_3 (M = Ti, V, Cr, Mn, Fe) compounds, **78,** 103
Yb 3d photoemission spectra of $Yb(Ba_{0.8}Sr_{0.2})_2Cu_3O_7$ and YbF_3, **78,** 187
X-ray reflectivity
Platinum carbon multilayer grating: preparation and characterization, **80,** 497
Thermal stablity of nickel–carbon XUV multilayers, **80,** 453
X-ray resonant Raman
Resonant Auger spectra of Y, YF_3 and YCl_3 in Y L_{III} absorption edge, **78,** 123
Soft X-ray resonant Raman and resonant Auger spectra in Si-*K* absorption edge, **79,** 207
X-ray scattering
Circular dichroism in VUV- and X-ray atom scattering caused by virtual photoionization, **79,** 331
X-ray spectromicroscopy
Biological microscopy and soft X-ray optics at Stony Brook, **80,** 337
X-ray standing wave
Interface roughness and density characterization of multilayer mirrors by using X-ray standing waves, **80,** 449
X-ray telescope
Application of multilayers to VUV and X-ray astronomy, **80,** 375
X-ray tomography
A novel analysis method for plasma light and soft X-ray tomography data including the three-dimensional diffusion in a semiconductor detector array, **80,** 279
Plasma diagnostics using vacuum ultraviolet radiation and soft X-rays in the GAMMA 10 tandem mirror device, **80,** 275
XAS
Theory of XAS and EELS in unfilled shell systems, **78,** 119
Xe
Cross sections and angular distributions of the photoelectron correlation satellites of the the Xe atom, **79,** 315

Y L_{III} absorption edge
Resonant Auger spectra of Y, YF_3 and YCl_3 in Y L_{III} absorption edge, **78,** 123
Yb compound
Yb 3d photoemission spectra of $Yb(Ba_{0.8}Sr_{0.2})_2Cu_3O_7$ and YbF_3, **78,** 187
$YbInCu_4$
Temperature dependence of the valence-band photoemission spectra in $YbInCu_4$, **78,** 139

Zone plate
Monochromatizing phase modulation multilayer zone plates, **80,** 373
Soft X-ray microscope with zone plate at UVSOR, **80,** 365
